

WRIGHT FLIES 1600 FEET HIGH

Aviator Breaks Aeroplane Records By Remarkable Ascent at German Capital

CROWN PRINCE TAKES A TRIP

Frederick William Enjoys a New Sensation as Companion of the American Aeronaut in Short Flight

Princess Wilhelmina, who is a devoted aviator, accompanied the prince on his flight.

The prince and princess were accompanied by a large number of attendants.

The flight was made in a biplane, and the prince and princess were both in the cockpit.

The prince and princess were both very brave and enjoyed the flight very much.

BAKERSFIELD SUFFERS HEAVY DOWNFALL OF RAIN, CAUSING FLOOD

BAKERSFIELD, Cal., October 2.—Rain began falling shortly after dark Friday night and continued intermittently throughout the night and today, culminating at 2:30 this afternoon in a tremendous downpour, preceded by thunder and lightning. Within the space of ten minutes nearly forty hundredths of an inch of rain fell, and the streets were filled with water, doing some damage to basements.

CARNIVAL PARADE IN NEW YORK CITY

Hudson-Fulton Celebration Is Ended With a Brilliant Display of Pageantry.

NEW YORK, Oct. 2.—New York city's share in the Hudson-Fulton celebration ended tonight with a carnival parade, a display of fireworks and a warship illuminations on the Hudson river.

The city was in its gayest mood tonight for the carnival pageant, with thousands of marching men in varied costume and its fifty elaborate floats designed to recall not only the city's beginnings, but also historical scenes that have inspired the writers of poetry, music and drama.

At 3 o'clock when the long procession started, the crowd of spectators was the greatest of the week's celebration.

Leading the pageant was an ornate float in the shape of a giant dragon, spouting flames and surrounded by fire. At the end of the parade was a float carrying the nation's flag, preceded by a band of music.

During the day the children of Greater New York had their flag, the whole city gathered with the youthful celebrants and children, carnival was held in every available open space throughout the different boroughs.

There were forty-six separate parades in which 500,000 children took part.

Because of weather conditions there were no flights of dirigibles or airships from Governor's Island today.

WOMEN'S LEAGUE TO ENCOURAGE CUPID

National Union Organization Will Give Premiums to Members Who Marry.

CHICAGO, Ill., Oct. 2.—Marriage benefits are to be accorded by the National Union of Women's Clubs. The amount of the benefit will depend on the number of years that the girls have been members of the union.

CHICAGO, Ill., Oct. 2.—The Juvenile Protective association started a crusade yesterday against a practice of sending children to foreign lands of fruit and vegetables from the garbage cans of the South Water street commission houses.

It has been learned that a great part of the refuse thus accumulated is carried home and used by families in the adjacent districts.

DECLARES SUICIDE TO BE DELIBERATE

SAN FRANCISCO, October 2.—Peter McDonald, a well known Shiner, shot himself dead today in a room of a local hotel, leaving a note for the coroner, saying:

"I am a deliberate suicide. Bury me in a cheap grave."

Just before the body was found Mrs. McDonald appealed to the police to find her husband. He had left home last night to get shaved. Dependence due to his long residence is believed to have prompted the suicide.

JOHN KLING WINS POOL CHAMPIONSHIP

KANSAS CITY, Mo., Oct. 2.—John Kling, the well known baseball catcher, tonight won the pool championship of the world from Charles Fawcett, Western of Kansas, Pa., the first score being 500 to 479.

TAFT REVIEWS POLICIES OF THEODORE ROOSEVELT

President Discusses National Problems Before Throng At Portland—Expressions of Appreciation For Army—Twenty Thousand School Children Form Living Flag

PORTLAND, Oct. 2.—Carrying out a program which was announced in special reference to his comfort and convenience and yet calculated to give the people of the entire city an opportunity to see the chief executive of the nation, President Taft spent what he declared to be the pleasantest day of his Western trip in Portland today.

The day of the President's visit was one of cloudless skies and a summer sun. There was but one untoward incident, the arrest of a man who carried a camera, and in his efforts to get into the front rank of spectators just as the President was leaving his hotel, caused his apprehension by the police.

When the man, who gave his name as Arthur G. Wright, was searched, a revolver and an extra supply of ammunition was found upon him.

Wright tells a straight-forward story. He states that he is a draftsman in the employ of the G. W. and P. Smith firm of Company of Roxbury, Mass., and that his mother lives in Portland, Me., and his father in Lowell in the same state. Wright explained his possession of a special police badge by saying it was given him five years ago by Chief of Police Hosmer.

Wright claims to have been on a three months' pleasure jaunt through the West. The police will not have pending further examination into his antecedents.

It was the first "afternoon off" the President has been allowed since his trip began and he was not backward in expressing his appreciation to his Portland hosts.

After a quiet dinner with Senator Burne and the members of his party, the President proceeded to the Portland hotel at 4 o'clock, where he made a brief address.

The President referred to the fact that with his coming to Portland he had already made eleven speeches during the present trip.

"I suppose you are all tired of me," he said to his audience, "but I think you could not talk about me."

He then referred to his appointment of a commission to investigate the tariff, and said that he was sure that the commission would make a good report.

He then referred to his appointment of a commission to investigate the tariff, and said that he was sure that the commission would make a good report.

MOB OF STRIKERS RESCUE COMRADES FROM CONSTABLES

SALT LAKE, Utah, October 2.—The first lawlessness in connection with the strike of laborers at the Utah Copper mine occurred today when an attempt was made to arrest five foreign laborers on the charge of carrying concealed weapons.

The men were taken into custody by five officers, who started to take them to jail. The officers were met by a crowd of seventy-five strikers, who demanded that the officers surrender the prisoners. To demand was reinforced by a display of guns and revolvers, and the prisoners were released.

The carloads of Japanese have been brought into the mine to replace the strikers.

POLITICS STIRS UP SUFFRAGISTS

Lively Contest When Officers Are Chosen By Delegates to Stockton Meeting

STOCKTON, Cal., Oct. 2.—For a time today the closing session of the suffrage convention was much like a political fight, with delegates in an uproar while disputing over the election of officers.

The election of officers was quiet and without incident until the election of a secretary, when some of the delegates protested that she was not the woman for the place and for the time the president could not maintain order, so many were talking. Words were spoken that were later regretted and when Mrs. Lillian Harris Coffin pleaded for the election of a secretary, the delegates in an uproar.

The delegates in an uproar, the delegates in an uproar, the delegates in an uproar.

CONFESSES BRUTAL CRIME

Willis Earnsting Arrested on Charge of Killing Aged Miser in Los Angeles.

LOS ANGELES, Oct. 2.—Willis Earnsting, 35 years of age, a poultry and egg dealer, is in the city jail charged with the murder of William Walters on the night of August 14th last, and it is alleged by the officers who made the arrest today that he has confessed to the crime.

Salters was 74 years old and came to this city from Tacoma. He was considered wealthy and eccentric, and lived alone. His dead body was found in an alley between Spring and Main streets late at night and it was believed that he had been struck by the pole of some passing wagon and killed. A coroner's jury rendered a verdict of accidental death. The evidence leading to this belief was strong, but Deputy District Attorney McCormick was not satisfied with this verdict and the arrest of Earnsting today is the outcome of his investigation into the case, which he has been conducting ever since the verdict was brought.

Earnsting, it is said tonight, tells of being intoxicated on the night of Salters' death, and of meeting him in a saloon and enticing him to his home for the purpose of robbing him. When Salters resisted and made his escape, he says, he followed and overtaking him, dragged him into the alley and struck him on the forehead with a club.

Officers say that Mrs. Earnsting may be arrested as an accessory.

WIFE IMPLICATED IN THE AFFAIR

Death Was at First Supposed to Be Accidental; He Was Clubbed to Death After Being Dragged Into Alley

CLAIM WEBSTER'S LIFE THREATENED

Defense Opens Its Case in
Murder Trial.

Witnesses Placed on Stand
to Show That Batty Bore
Bad Reputation.

In the trial of George Webster for the murder of Joe Batty, the defense sought to show today that Batty had threatened Webster's life many times prior to the killing when he was shot and killed.

District Attorney Church for the people closed his side of the case yesterday morning at 11 o'clock and Attorney L. J. Schino, for Webster, immediately arose and addressed the jury, outlining the defense that would be put up.

In the course of his remarks, Schino declared that Webster had feared for his life for a long time prior to the shooting and that Batty had made threats against his life. Schino also stated that the defense would show that on the day of the shooting, Webster was a sick man and was not able to engage in a physical combat with Batty. He further declared that Webster believed Batty to be armed and got a gun to protect himself. In closing, Schino declared that the defense would show that Batty had been warned just before he was shot, not to approach too close to Webster, but that he did not heed the warning.

Schino further added that Webster was obliged to put himself under the protection of peace officers to save himself from bodily injury at the hands of Batty.

Six more witnesses were placed on the stand yesterday morning to prove that at the time of the shooting Batty was unarmed. These witnesses were Johnny Lander, E. Arnold, Fred Barrett, W. B. Scott and Peter Dagg. John H. Redman, a deputy constable in Mariposa county, Fred Margrave, formerly a deputy sheriff in the same county, and James F. Choyce, a constable in Mariposa county, were placed on the stand yesterday morning by the defense and all stated that Batty bore a bad reputation while in that county. The case was continued at noon until Monday morning.

CENTENNIAL WEEK BEGUN AT ST. LOUIS

ST. LOUIS, Oct. 2.—The opening to St. Louis centennial week was sounded by the whistles of the river front at noon today when the second division of the Atlantic torpedo flotilla, headed by the flagship MacDonough, steamed into the harbor under the escort of city, state and centennial officials and moored at the foot of Market street.

For five miles along the water front, the four torpedo boats MacDonough, Thurg, Wilkes and Thornton paraded while thousands upon thousands flocked to the levee to see the warships.

Glenn H. Curtiss, with his aeroplane, will be a feature of the centennial.

RALLY BEGINS TODAY IN LOCAL CHURCH

The Congregationalists Plan
Week Full of Interest.

Rev. A. W. Palmer to Give
Series of Addresses on
How Religion Helps.

Fresno Congregationalists today begin a "Congregational Rally Week." Morning and evening services today and tomorrow and evening services during the week will be conducted by Rev. Albert W. Palmer, pastor of Plymouth church, Oakland. It is expected that the week of effort will serve to enthrone the church membership for the winter's work and also to bring to the church many Congregationalists, residents of the city and district who have not hitherto allied themselves with the local church.

Apart from the interest attaching to the services from the viewpoint of the Congregationalists, there is an added interest for the general public in the coming of Rev. Palmer. A young man, an advanced religious ideas and an eloquent speaker and an expert debater. As it is understood that during the week a cordial invitation will be extended to all who desire to question the preacher, there will doubtless be much more than the usual interest taken in the services.

Rev. Palmer, while not a native son, is a Californian by adoption at a very early age, his father having been a resident of Los Angeles in the early '80's and Mr. Palmer's earliest recollections being associated with that interesting settlement north of the Tehachapi at that remote period of its history. He was graduated from the University of California with the class of '01, after which he passed three years at Yale. Returning to California, Mr. Palmer was assistant pastor at Highland for three years, and then came to his present pastorate at Plymouth church, Oakland. He comes to Fresno in response to an invitation of the pastor of the local church and the board of trustees, the special object being to open the winter season with a series of services of a special character at a time when the members of the church are returning from vacation and preparing to enter upon the work of building up the church.

The subjects of discourse today are as follows: Monday at 11 o'clock, "The Divine Friendship"; Tuesday at 7:30 o'clock, "The Mountain Trail and Its Message." The title of the evening address suggests that the preacher is something of a mountaineer and such is the fact. A member of the Sierra club, Mr. Palmer accompanied the club on its summer pilgrimage for the last three years to Kings river canyon in 1907, to Kern river last year and to Tuolumne meadows this year. In 1907 he passed through Fresno with the club on its return from Kings river canyon and says he still retains a very vivid recollection of a beautiful watermelon furnished for the returning mountaineers by the Chamber of Commerce on that occasion. He returns to Fresno at this time with a desire to reciprocate in a measure the hospitality he then enjoyed.

Rev. Palmer is not a "revivalist" in the generally popular sense of that term. He impresses on first acquaintance as a young earnest student, gifted with unusual powers of expression, much earnestness and a sane view of things in general. He is optimistic and expresses the belief that religion is something to live with and to live for. Perhaps the most interesting message he will give for Fresno people this week will be given in the series of evening addresses on "How Religion Helps." As the title would imply to the uninitiated, it means something more than the stereotyped religious recitations of the past. It means himself, his life, his own experience, the latest development of practical religion most generally known by the name of "The Emmanuel Movement." On Monday evening his subject will be "The Emmanuel Movement and Its Practical Values." On Tuesday evening, "The Conquest of Fear and Worry." On Wednesday, "On Getting Along With Other People," and Thursday evening, "The Secret of Rest," each of which will deal more or less with the subject in which Mr. Palmer is taking especial interest and which is attracting widespread attention from religious thinkers and workers.

The afternoon meetings are intended to be of especial value to parents and teachers, the general topic being "The Boy and the Bible." Mr. Palmer thinks he has a message in behalf of the misunderstood and generally misunderstood and handled boy who looks upon the Bible with aversion and upon church with fear. A voluntary choir will assist with the musical part of the services today and during the week. This evening a special feature will be the singing of sacred solos by Miss Maude Lehman.

MARRIED SECRETLY OVER A YEAR AGO

Interesting Romance Revealed By Announcement from Santa Cruz of Marriage of W. E. Peck.

The Santa Cruz News gives the following account of a secret marriage occurred a year ago, the news of which has just leaked out. The groom is a well known Fresnoan:

"A romance involving a secret marriage over a year ago has just come to light in the announcement by William E. Peck, elder son of the late Mrs. Sarah E. Peck of Green Valley, that he and Miss Olive Andrews of Watsonville, who for the past five years has been employed in the candy stores of J. A. McCallum and Buckhart Bros., are about to be married in the city of San Francisco."

"The wedding, which was kept secret from even the closest friends of both parties for over a year, took place on September 18, last year, in San Francisco. They were married by Rev. Britton L. Wolfe of St. Paul's Episcopal church of Salinas."

"Mr. and Mrs. Peck now choose to make their marriage known, and will start housekeeping in Fresno, where the groom has a good position as circulation manager of the Fresno Republican."

PEARY DECLINES TO MAKE STATEMENT

PORTLAND, Maine, Oct. 2.—An announced conference, lasting nearly an hour between Commander Robert E. Peary, the Arctic explorer, and General Thomas H. Hubbard, president of the Peary Arctic Club, was held in the Union station here tonight.

General Hubbard was on his way from Bar Harbor to New York. Commander Peary was at the station to meet him.

"I have no remarks to make," said Commander Peary as he started to return to his hotel. "General Hubbard and I have just had a very pleasant

SWITCH TENDER IS HELD RESPONSIBLE

J. R. Dalton Blamed for Wreck in S. P. Yards.

Board of Inquiry Convened and Makes Investigation of Accident.

That J. R. Dalton, a switch tender in the employ of the Southern Pacific, was held responsible for the wreck which occurred when passenger No. 45 collided with a switch engine, was the verdict rendered yesterday by the board of inquiry called to investigate the cause of the accident. Dalton will in all probability be dismissed from the service, although no action in his case was taken yesterday.

The board of inquiry, consisting of the following, was in session practically all day yesterday investigating the wreck:

J. E. Buchanan, assistant division superintendent.
E. M. Shultsberger, master mechanic at Bakersfield.
M. H. Warren, master car repairer at Bakersfield.
De Witt Gray.
H. P. Knight.

The establishing of a board of inquiry to investigate accidents of this nature is in line with a policy inaugurated by the late E. H. Harriman some time before his death.

Assistant Yard Master Foley was the first witness called yesterday morning when the case was opened and he explained the position of the tracks where the wreck occurred. The wreck, it appears, occurred on what is known as a puzzle switch, leading from the main line to what is called the ladder. When closed this switch

prevents entrance to the main line or across from the main line.

Coley stated that the ladder consists of six switching tracks leading from one track known as the lead. This lead is used for all switching and the number of cars carried to the switch engine is the limit, and when the switch engine is at the lead, the switch engine is at the lead.

J. R. Dalton, the switch tender, stated that just prior to the approach of the passenger, he threw the puzzle switch opening the lead to the main line. The switch engine was coming after the cars and he saw the lead from the main line. Dalton stated that he saw the passenger approaching, but supposed it would clear the switch before the switch engine arrived. When asked why he had thrown the puzzle switch when he knew the switch engine was working on the lead, Dalton stated that he understood the switch engine would come back with a load too big for the lead. He added that he did not notice the approach of the switch engine, but was watching the approaching passenger.

Dalton endeavored to blame the switch engine for coming out of the lead too fast, but upon further examination admitted that he had thrown the switch engine onto his own tracks, and that the passenger would clear the switch before the switch engine arrived.

Frank J. Adams, the engineer on the switch engine, was next called. He stated that he was working on the main line about 3:45 minutes before No. 45 was due to pass and then went into the lead to wait for the passenger to pass. From the main line he went down to track five and then he received an order to go ahead to the puzzle switch, take the lead back onto track one. Adams stated that he obeyed orders and thought the engine would take the lead, but discovered too late that the puzzle switch had been opened.

When he discovered that the switch was open it was too late to stop the engine, but Adams did state that had he known the switch was open he would have been able to stop.

W. W. Day, foreman on the switch engine, was next called and he told the same story as Adams. He stated that while he saw the passenger approaching he thought the switch engine would take the lead.

Foreman J. J. Burns and Helpers S. R. Allen and S. J. Beck also testified but their testimony threw no additional light on the case.

The examining board spent a portion of yesterday afternoon going over the tracks where the accident occurred and then rendered its decision.

RAINS DID NOT INJURE RAISINS

Only Those on Paper Trays Will Suffer.

Grower Gives Opinion That Wind in Next Few Days Will Do Good.

That the rains of the last forty-eight hours will do little or no damage to raisins in general throughout the county is the opinion expressed by a number of growers last evening.

It was stated that those raisins on paper trays will of course suffer to some extent, though the rains were hardly heavy enough to soak the trays through. In most instances, however, the growers using paper trays had anticipated the storm and stored their product before the deluge commenced. Those using the wooden trays had in a large majority of cases stacked their raisins.

The rains this year came too late to do much harm. It is stated that in 1905 the first rains came early in September, and that by the 15th of October this section had received as much as five inches of rain. This served to keep the raisins green and healthy and since that time these growers have benefited by that experience have suffered but little from early rains.

"What we need now," said one of the growers last evening, "is a good stiff wind. I believe that such a wind would prove of benefit. There is no danger now of wind being blown in the valleys owing to the fact that it has all been told by the light rains. And further than that I will go so far as to say that the recent rains actually benefited some of the raisins on the wooden trays. Most of these had become rather dry and shrunken, and the little watering that they received will cause them to swell to the proper degree without actually harming them."

CANNING SEASON CLOSED IN SELMA

Forty-Three Thousand Cases of Peaches Put Up; Quality of Fruit Very Good.

SELMA, Oct. 2.—Work at the Selma cannery has closed for the season, and only a few hands are employed in the shipping department and in the office. This season has been a particularly good one in that the quality of the output has exceeded all others, and a large percentage of the entire output has already been sold, and is now only awaiting instructions for shipment. Over forty-three thousand cases of peach were put up this year in addition to smaller quantities of other fruits. The peculiar adaptability of Selma's soil to peach culture has stimulated a desire on the part of the local cannery to establish a reputation for peach canning in the Selma label.

In the past peach fruit has been found by local fruit producers because so much of our dried fruit and raisins have shipped out under labels of other towns, which the packing companies had headquarters. This season, however, has seen their houses here doing all they could to associate "Selma" with their products, thus making the town better known in the East, where our goods are shipped.

Interest in athletics is already keen at the high school, and the evening practices of the football squad indicate that Selma is going to make a strong effort for the valley champion this year. The team promises to be the strongest Selma has yet had, and under the coaching of Mr. P. H. Smith, who has charge of school athletics, several plays new to the valley are being practiced. The first game to be played here has been set for November 25 and an effort is being made to arrange a Thanksgiving game here with Fresno.

Mr. F. W. Van Dusen, who has been in Los Angeles, has returned and will make Selma his home this winter. Ed W. Hunsinger returned yesterday from a three weeks' vacation at Los Angeles and nearly coasted around the Selma today to fill the vacancy in the cannery had been caused by the resignation of Miss Hester. Hester and Mr. and Mrs. L. L. Hunsinger and son, Roy, left tonight for the city, with the expectation of making their home there.

The Greatest Collection of New Fall Garments We Have Ever Shown

Hundreds of New Fall Suits to Choose From, Hundreds of New Fall Skirts to Choose From, a Great Gathering of Dresses to Select From, Waists and Millinery in Splendid Variety.

To gaze at the hundreds of new fall garments one may well be led to think they were in some big eastern city store. The immensity of stocks is greater than we can tell you in print, but just a peep into our suit department will quickly convey to you what we mean. There are many hundreds of new fall suits—very moderate in price, there is no need of paying any more than you wish for your New Fall Suit.

If it's a suit at \$20 we have them; if it's a suit at \$25.00, we have them; if it's a suit at \$30, we have them, and if it's a suit at \$35, \$40, \$45 or \$50, we have them—in fact, up to \$100. But it is not the price alone, it's what you get for what you pay. Our garments are the very best possible at each price—quality considered, and whatever price you pay, you get the value at each price. We can't begin to describe styles—there are too many. Just come and see. All in all this is a most sumptuous showing of the authoritative styles in tailored suits and the wide price range insures satisfactory selections to everyone.

Pretty Dresses for Afternoon and Evening, Rich in Beauty and Very Moderate in Price

For the most ceremonious occasions we have assembled a splendid variety of costumes. The salient effects of the Moxen Age are cleverly brought out in these styles. They are made of broadcloth in the light evening shades, such as pink, light blue, in crepe de chine, silks, including such as fuzze, chamois, green, nile, lavender, wisteria, in fact a good presentation of the most desirable colors for afternoon and evening wear. The broadcloth dresses will command a great deal of attention because they are so very useful and very elegant in appearance.

A Few Words About Our Greatly Admired and Talked of Millinery

Large hats are still in favor, even the toques and turbans being extremely large. Side rolled and shapely up turned brims are highly favored. Fabric covered hats of velvet, plush, beaver and fur are extremely popular. Our millinery display is indeed a beautiful one. Scarcely a good style missing and many exclusive effects are offered for your selection. We wish to impress the fact that while our millinery is rich—in fact handsome—the prices are exceedingly low. An excellent range from \$5.00 to \$65.00.

Novel Waists for Fall That May Interest You

The separate waists because of the vogue of the tailored two-piece suit this season are an indispensable adjunct to one's wardrobe. The new styles trend toward simple effect in style and cut, the most noticeable changes being in the sleeves and trimmings. Our showing includes many leading staple novelty shades and will commend itself to women of fashion in every detail of style, quality and price. We are showing the plain tailored effects in plain linen, embroidered linen, satin damask, then the silk tailored waists in taffeta, beautiful Persian designs in silks, also-voiles. Then there are also a few chiffon over Persian silks.

The New Idea in Separate Street Coats

A different and surpassing exhibit of these garments for which a great vogue is certain this season. More trim than in recent seasons, fitting the form just snugly enough to bring out the line of the figure. In varying lengths from three-quarter to full length. Many novel Moxen Age adaptations are included, evidenced in the extended waist line and the effective use of the hip trimmings. To see separate coat styles at their best, come and view this showing now. The prices are equally as attractive as the garments themselves.

The Wonder

Cloak & Suit House.

We Will Give Away a \$575 Steinway Piano

A coupon will be issued with every dollar purchase, and the one holding the greatest number of coupons on the evening of December 24th, will receive the piano. This piano is a brand new instrument and will be delivered complete with stool and scarf. It is guaranteed and will be kept in tune for one year free of charge.

We will be pleased to Receive Mail Orders and Give Them Prompt Attention

WOULD HAVE QUAIL SEASON SHORTENED

Postponement of Opening Date Equally as Good, Says the Game Warden.

A shorter season for quail for a postponement of the opening date, is the recommendation made by R. E. L. Coley, county game warden, in his monthly report to the board of supervisors, which was placed on the agenda. Coley stated that this season the quail hatched twice and that the second hatching is too small at this time for shooting. A fine run of black bass is reported with big hatchings of salmon and striped bass. Abundant quail are plentiful and valuable game are plentiful in different portions of the county.

Three arrests and convictions have been secured for violations of the county game laws. Charles F. H. of Colton was fined \$25 by Justice Kerr S. Siskelson was fined \$25 by Justice Watson for dynamiting fish and J. E. Oberster was fined \$25 by Justice Robinson for having firearms in his possession.

BLACKBOARD SLATE WANTED

The Board of Education of the City of Fresno School District will receive bids for furnishing blackboard slates for the new buildings about to be erected. The quantity required will be about 1,000 square feet, about 1 1/2 feet wide, 18 to 24 inches high, the balance three feet high; all to be of the best quality, black, split slate, free from defects. Slates to be cut to fit spaces and marked. Exact dimensions will be furnished as soon as buildings have been erected sufficiently to take measurements. Quotations to be in the form of a bid to be in the hands of the Board on or before Monday, October 18th at 7:30 p. m.

Our Cooking Marvel Cole's Hot Blast Range Makes One Scuttle of Coal do the Work of Two.

Cole's Hot Blast Range burns coal by the celebrated Cole's Hot Blast Combustion. No other range does.

This is how it works. Read why it makes one scuttle of coal do the work of two. Cole's Hot Blast Draft feeds air to the fire at the top, just as shown in this picture. Do you see what this draft is doing? It is burning the gas as it arises from the coal. Soft coal is half gas, always wasted in other ranges, so this makes a saving of one-third to one-half in the monthly coal bills. The flame from the burning gases is carried clear to the back lids, and the entire top is thus evenly heated, instead of just the front lids. The heavy smoke and soot is burned with the gases, which means that the lids and the cooking utensils are not smudged up with soot and smoke. It also means that the oven temperature is kept at a given point without poking the fire or replenishing the fuel, and that the fire requires only half the attention of other ranges.

Shows Hot Blast Draft

CONSERVATION

Congressman Smith, in the Bankers' field Echo, opines that if the conservation issue were clearly defined, there would be "very few people" on the wrong side of it.

To be sure, "very few people," but some tremendously big interests, and in these days interests as well as people get heard.

But let us define the "conservation policy," since a definition is called for.

Broadly speaking, the "conservation policy" involves a reversal, as to the remaining natural resources owned by the government, of the policy hitherto followed as to agricultural land. The best way to dispose of agricultural land is to give it away, in individual parcels of one-family size, to individuals who will make homes on it. The intelligent selfishness of the individual owner is relied on to utilize that land in the way that will best increase and conserve its value. Because agricultural land was the natural resource in chief demand for disposal, and this was the best way to dispose of it, similar methods were applied by analogy to the disposal of other resources. The failure of the method, as to everything else, is as manifest as its success as to agricultural land, and the new policy involves the thorough reversal of that method.

Two things are to be "conserved"—first, the existence of the natural resource, for the use of humanity in the future as well as in the present, and second, the ownership of that resource, in the whole people, rather than its unconditional donation to individuals. In the case of inevitably exhaustible resources, like minerals, the conservation involves prevention of waste, the prevention of monopoly, and compensation to the whole public, which owns them, from that part of the public which uses them. In the case of permanent resources, like forests, water (and possibly grazing lands) it involves also so administering them that they shall be used but not destroyed. And it involves doing this by the national government, in the case of those resources owned by the government. It means that, as to that portion of its property which is now most important, the national government shall reverse the policy which it properly followed as to that portion of its property which was formerly most important.

And, as we said, "very few people" are opposed to this policy. But some very powerful interests are.

EXPENSIVE GAME

The opening of the duck season has called forth some very tart comments on the State Fish and Game Commission, which, officered by such eminent sportsmen as George Stone and Jack Steppacker, collects from the people nearly two hundred thousand dollars a year, and does "with it—nothing knows what." The following, for instance, from the Stockton Record, is eloquent with figures:

"This morning it became lawful to kill wild ducks and quail in California, provided the hunter has taken out a hunter's license and paid one dollar therefor. In this county 2350 hunting licenses have been issued this year. All of the money obtained from the sale of hunting licenses goes to the State Game and Fish Commission and the law provides that the fund shall be used for the propagation and protection of fish and game and for the enforcement of the fish and game laws. The first year that the hunting license law was in force the Fish and Game Commission received \$116,579 from that source. From other sources, state appropriations, fines collected and the like, the commission's income was swollen to \$184,467. The Fish and Game Commission for that year cost the people of the state almost six times as much as did the governor's office, eight times as much as did the controller's office and eight times as much as did the state department of public instruction. The sum received by the commission for the fiscal year ending last June was undoubtedly greater, and, for the present fiscal year, will be greater still."

What could the State Board of Health do with two hundred thousand dollars, to investigate questions of public sanitation? What could the department of public instruction do, with two hundred thousand dollars to spend in better supervision of the education of children? What could the controller do, with two hundred thousand dollars to investigate ways of improving the public accounts and saving many times two hundred thousand dollars? What could the governor do, with two hundred thousand dollars for expert commissions, to investigate and propose constructive legislation and administrative reforms? For that matter, what could the Fish and Game Commission do, with two hundred thousand dollars, to improve and preserve the game? Does it do it? Nobody knows, and the commission won't tell.

ON TRIAL

The Calhoun trial has gone over until after election. That means definitely that the Calhoun trial is a political issue, and that the people of San Francisco are going to vote on it at the coming election. By the vote of the great jury of all the people, Calhoun will be convicted or acquitted. And really, that is not so monstrous a thing, after all. A jury trial itself is in principle a submission of the

issue to the people. Only, in the ordinary case, it would be impracticable to submit the evidence to all the people and get their verdict so the device has been resorted to of submitting it to twelve average persons, omitting any who might happen to be personally interested or biased, and taking their verdict as presumably the same as any other twelve, or all the twelve together, of the average citizenship would render. It is just as we pass most laws by legislative bodies, instead of by general referendum, on account of the obvious physical and mental impossibility of any other course. But in the exceptional case in which a law is passed by direct plebiscite, there is nothing invalid or inconsistent about the method. So, in principle, there is nothing irregular in submitting the exceptional criminal or civil case to a jury of all the people. Of course it happens that there is no formal provision for this procedure, and therefore its verdict is of no technical validity. But as a public pronouncement, it is right to appeal to it.

Of course neither all the people, nor twelve of the people, can alter the fact of Calhoun's guilt, if he be guilty, nor of his innocence, if he be innocent. A verdict determines not what is true, but what shall be done. Indeed, in a case like this, where the truth is perfectly certain, the effect of the verdict is to seal, not the guilt or innocence of the defendant, but the mental and moral quality of the jury. That is the significance of this public verdict. San Francisco unanimously believes that Calhoun is guilty. Search the ranks of Calhoun's warmest defenders and you will find not one who will look you in the eye and say, on his personal honor, that he frankly and honestly believes that Calhoun did not pay money to get franchises by what he realized amounted to bribery. This is not the technical wording of the charge against him in court, but it is the substantial nature of the charge against him before the people. On that charge, the actual opinion of the people is unanimous. The vote of the people will be the test of their loyalty in action to their own convictions.

**LONG COAST TRIP
AT COST OF ONLY \$1**

Warfare of Steamship Companies Has Demoralized Traffic Between San Francisco and Los Angeles.

LOS ANGELES, Oct. 2.—The war of the steamship companies is on in costly earnest and a passenger can ride from Los Angeles to San Francisco, meals included, for \$1. Counting the tolls levied between this city and the beach, the total is \$1.35. This includes all meals and state room. It is cheaper than staying at home.

The thousands of homeseekers that have reached California on the coast steamers are not the only ones to be benefited by the war. The railroads are running trains minus much of the heavy traffic that they usually have at this season. The traffic agents regard the military steamship men with disgust. The \$1 rate between the two coast cities was reached last night when the West Coast line met the previous big fare between this city and the beach, the total is \$1.35. This includes all meals and state room. It is cheaper than staying at home.

The West Coast Company is selling out all its boats for San Francisco at their present rate of \$3.35 first class, and \$3.25 second class. Practically every berth on the Santa Rosa has been sold for Monday's sailing. The President and the Topical reservations were also put on and are practically gone.

The steamer St. Croix of the Schuch-Hamilton Company arrived yesterday from San Francisco with the limit of passengers, and was already sold out for the return trip before she reached this port. It is expected that the latter company will make another cut to meet the West Coast, and that the Pacific Coast people will do likewise.

**YOUTHS RUN AWAY
FROM THEIR HOMES**

Word was received in this city last night by the police from R. T. Brooks of Merced that his son, Roy Brooks, and another boy by the name of Robert Carey, had run away from their homes in Merced about 9 o'clock Friday night. The boys are supposed to be headed for Fresno, where they will seek work in one of the local packing houses.

The Brooks boy is 15 years of age and about 5 feet 6 inches in height. He is of a light complexion and has blue eyes. The lad also has pimples on his forehead. At the time of his disappearance he was wearing a light brown suit, brown coat, and blue overalls and heavy shoes. Robert Carey, Brooks' long-time partner, is about the same size and age, but has dark hair and an extra large mouth. He was wearing a dark coat and a black hat.

**WORK STARTS ON
CATHOLIC ACADEMY**

The contract for the building of St. Augustine academy at the corner of Mariposa and R streets has been let to Ryan & Milard and work on the structure was started within the past few days. The building price is given at \$3200, and the structure will be ready for occupancy in about one month's time.

While it will be a frame building the academy will have every modern convenience. The lower floor will contain the recreation and dining hall, both of which will be commodious and airy. The upper floor will contain the dormitories with all the necessary appointments. When completed the academy will be in charge of Sister Florin.

**FRESNO IS FULL
OF HOMESEEEKERS**

Small Tracts of Raw Land in Great Demand.

Other Towns of Valley Are Also Drawing Share of Easterners.

Fresno hotels just now are fairly well filled with Eastern homeseekers, and the real estate dealers as a consequence are leading forward to the present week for a brisk business in small tracts of land.

While no sales of any consequence were recorded during the week just closed, inquiries at the local real estate offices were numerous, and the automobiles which have remained here or less idle during the summer months so far as possible investors are concerned are now beginning to whirr or agents who have completely shaken that third feeling.

The demands of the homeseekers from the East at present in Fresno seem to be in general for raw lands. The fact that Fresno is the center of the greatest vineyard district in the world does not seem to matter to a good many of the Easterners, who declare they intend to engage in diversified farming should they decide to remain here, and therefore are anxious to secure land that has not been used before for vineyards or any such purposes.

Most of the homeseekers at present in Fresno are recent arrivals in the state, and the majority of them entered through the southern gates. Their original intention was to settle in the country about Los Angeles, but they were not long in discovering the fact that better inducements were offered in the San Joaquin valley. Therefore they turned back a short time in the south.

While Fresno, owing to its greater population and the fact that it is better known as the objective point of most of the Easterners the other cities and towns of the valley have not suffered. Bakersfield is said to be receiving its full share of homeseekers, as are Hanford and Visalia along with the other smaller towns in the south. To the north Tullock and Livingston appear to have shared the best in the number of homeseekers who have arrived within the past few days, with Atwater as a close second.

**ELECTRIC CURRENT
NOW ON IN SANGER**

SANGER, Oct. 2.—The San Joaquin Light and Power Company turned on the power from its new plant in this town last Wednesday and tonight the current has been distributed all over the city.

The power company purchased the electric plant owned by C. M. Blackman last spring and since that time has been using that plant to furnish electricity to Sanger until the completion of the present plant.

W. F. Parker of Canada is visiting his brother, A. M. Parker. He will probably settle in Fresno county.

Miss Marion Senger has resigned from the High School teaching force and accepted a position in the Pasadena High School.

Mrs. Harry Gallagher and daughter Mabel returned from a visit to San Francisco a few days ago.

Miss Sapphira and Miss Nell Chambers have entered the State Normal school at San Jose.

Mrs. H. P. Holmes and Mrs. Farley will attend the annual convention of the W. C. T. U., which convenes in Pacific Grove next week.

Mrs. Mary Matthews is home from a visit in Santa Ana.

Mr. and Mrs. Max Frankman and Mrs. Sig Frankman will soon start on a trip to Germany.

**TWIRLING LIGHTS AND FLASHING SKIRTS GIVE
GORGEOUS ATMOSPHERE TO "A KNIGHT FOR A DAY"**

There are lots of good things in "A Knight for a Day," which comes to the Barton next Wednesday direct from Chicago, where it has had a full year's sensational run, and is now to be seen in a few of the largest cities. And the verdict after all the jokes have been heard, and the dances done two or three times—for they are extremely fetching in their way—and all the choruses have been sung with the accompaniment of twirling lights and flashing skirts, will likely be that the new piece will hold its own with any other musical comedy, and in many respects do a little better.

The organization of state people comprises many comedians, singers and actresses from the comic opera stage. Occasionally the "plot" concerning two Corsican lockets and a fortune in stage money, and a missing heir or two, and a few other things, is so cleverly handled that the audience is not aware of the plot. Edward Hume, the clever comedian, is the real lightning mainstay of the piece, and with Grace Denar, a comic maid given to chatter and eloquence, creates more than enough fun for everybody. They have some outrageously amusing hits, such as when the little comedian tells his midnight lady at every window of the girls' boarding school, getting various things he does not expect, but brings his faithful Tilly down at last, head foremost.

Edward Hume and some of the American Beauty Chorus. In "A Knight for a Day," at the Barton Wednesday evening.

**WASHINGTON CITY SORELY IN NEED
OF AN ACTIVE HUMANE SOCIETY**

The country naturally looks to its capital for enlightened and progressive action in everything that concerns municipal well-being. Every man who comes here from another city expects as he goes about to see the latest methods adopted and agencies set at work for the benefit and uplift of the citizen. He not infrequently finds that in some particular respect his own town is further advanced than his city, and it behooves us whenever we learn that such is the case to do our best to catch up.

There is no criterion in modern times by which the degree of civilization of a community can be more fairly gauged than its care for and treatment of the lower animals. Where they are neglected, half starved, and beaten, and where there is no provision made for the deserted, worn-out, and helpless, one may be sure that selfishness, cruelty, and a low order of intelligence prevail. That great apostle of good to the dumb animals, George T. Angell, recently declared, worked a marvelous change of attitude both in this and other lands during his lifetime, and in every city there is a society for the prevention of cruelty to animals.

Washington has a society which has

**HONOR SYSTEM IN VOGUE AMONG
UNIVERSITY STUDENTS IN VIRGINIA**

Below will be found the rules which govern the honor system as it is administered at Virginia.

The honor system is one of the most cherished features of the university life and is almost as old as the university itself.

The rules governing the administration of the system have been changed from time to time, but the spirit back of it remains always the same.

Any one believing that a breach of the honor system has been committed shall, with the assistance of such members of his class he may desire to call upon, investigate the matter as secretly and as speedily as possible.

The accused must then either leave college or demand the president of his class to convene the honor committee and try his case.

The accused may request a public trial before the honor committee, which case the members of the class

to which he belongs shall be admitted, but no others.

In the trial before the honor committee, both sides may be represented by counsel from the student body. Counsel shall have the privilege of asking the witnesses questions, but only such questions as will tend to bring out the facts of the case. Counsel shall not be allowed to make an argument, but the accused may say what he chooses in his own defense.

If, after a thorough trial, five of the six who compose the honor committee are convinced of the guilt of the accused, and shall so cast their vote in a secret ballot, after a vote taken by the department of which the accused is a member, in case of the absence of any member of this committee, the next highest officer in his department shall act in his place, the officers ranking in the following order: President, vice president, secretary and treasurer, and historian.

From the decision of the honor committee there shall be no appeal.

The honor committee shall consist of the presidents of the five departments of the university and the vice president of the department of which the accused is a member. In case of the absence of any member of this committee, the next highest officer in his department shall act in his place, the officers ranking in the following order: President, vice president, secretary and treasurer, and historian.

**WAGING COUNTRIAL WAR AGAINST
INSECTS DESTRUCTIVE TO PLANTS**

Saul slew his thousands and David his tens of thousands and yet those two famous killers of the ancients were never noisier when compared to F. J. Bush, head gardener on the Golden Gate National Reservation. He has slain his millions, not his billions, in years of warfare on insects which constantly threaten to eat up or kill the handsome trees which adorn the island. He and his men were out before dawn, and by noon the campaign against millions of moths and their eggs with which the hundreds of willow trees on the island were whitened. The moths were worst on the willows on that part of the island where William Wright and Glenn H. Curtis have their residences. The trees are so full of white cocoons they looked as if some one had walked along and made millions of dabs of whitewash on the bark. Both had six men at work. They were armed with brooms made of dried sweet wire, and the trunks and branches of all the trees were brushed down. The moths and their cocoons and eggs were slashed to pieces by the wire. Both in

so merciless on the insects that the soldiers say as soon as a moth sees him approach a tree it gets pale to the face, kisses its wife and children good-bye, and folds its less in hopeless resignation.

When Bush was staying his millions yesterday in getting the island in shape for the Hudson-Benton celebration, he pointed out that the female moths are so fond about the seasons they never make their cocoons and deposit their eggs on the side of a tree trunk or branch. Invariably they select a southern exposure, where there will be protected against wintry blasts.

Both said the myriads of white moths, which invaded Manhattan and Brooklyn last summer and attracted so much attention, resulted from failure of gardeners to rid trees of cocoons containing billions of eggs, such as he destroyed yesterday on Governors Island.—New York Press.

GETTING DISPLAY FOR COUNTY FAIR

Farmers Are Requested to Contribute Products.

Husmann Exhibit of Grapes Placed in Cold Storage for Big Show.

Secretary Robertson of the Chamber of Commerce, who has been appointed to have charge of the horticultural and viticultural exhibit at the Fresno county fair, which begins October 15th, is about to commence the work of gathering the necessary products. He has issued a request that all those having goods which they wish to display communicate with him at once in order that he may have some idea as to the manner of ex-

hibit that will be made. Those persons having products to show and communicate with the secretary as to the manner of transportation. It should be borne in mind that exhibits entered in competition must be accompanied by a fee of 10 per cent of the cash prize which they will compete for. Among the exhibits to be sent to the fair from the Chamber of Commerce will be the grapes which were placed on exhibition at the Chamber of Commerce about two weeks ago by Professor Husmann of the experimental station. These grapes have been placed in cold storage and will be in excellent shape for the fair.

Following is the list of prizes for the horticultural and viticultural products at the fair:

CLASS ONE—GRAINS AND SEEDS

Lot No. 1st. 2nd.

1. The most extensive, perfect and varied exhibit of farm products shown by one grower or other Society. \$10.00 \$5.00

2. The most extensive, perfect and varied exhibit of farm products grown by one person or farm. \$10.00 \$5.00

3. Sample of wheat—Subscription to National Farmer and Stock Grower. 2.00 1.00

4. Club wheat. 2.00 1.00

5. Sonora white wheat. 2.00 1.00

6. Proprietary wheat. 2.00 1.00

7. Barley, bearded—Subscription to National Farmer and Stock Grower. 2.00 1.00

8. Barley, beardless. 2.00 1.00

9. Barley, chevalier. 2.00 1.00

10. Barley, Nepal. 2.00 1.00

11. Oats—Subscription to National Farmer and Stock Grower. 2.00 1.00

12. Corn, white. 2.00 1.00

13. Corn, yellow. 2.00 1.00

14. All grains—Second subscription to The Country Gentleman. 5.00 2.50

15. Wheat, all varieties. 5.00 2.50

16. Barley, all varieties. 5.00 2.50

17. Egyptian corn—Subscription to The Country Gentleman. 1.00

18. Jerusalem corn. 3.00 1.00

19. Alfalfa seed. 3.00 1.00

20. Buckwheat. 2.00 1.00

21. Sugar beets—Analysis of sugar contents. 5.00 2.50

22. Tomatoes, shipping. 2.00 1.00

23. Tomatoes, canning. 2.00 1.00

24. White potatoes. 2.00 1.00

25. Sweet potatoes. 2.00 1.00

26. Onions. 2.00 1.00

27. Carrots. 2.00 1.00

28. Turnips. 2.00 1.00

29. Cauliflower. 2.00 1.00

30. Watermelons—Subscription to National Farmer and Stock Grower. 2.00 1.00

31. Muskmelons. 2.00 1.00

32. Casaba melons. 2.00 1.00

33. Beans. 2.00 1.00

34. Peas. 2.00 1.00

35. Cantaloupes. 2.00 1.00

36. Pumpkins. 2.00 1.00

37. Squashes. 2.00 1.00

38. Egg plant. 2.00 1.00

39. Celery. 2.00 1.00

40. Table beets. 2.00 1.00

41. Largest and most varied display of dried and canned fruits (for packers). \$10.00 \$5.00

42. Largest and most varied display of raisins. 10.00 5.00

43. Largest and most varied display of figs. 10.00 5.00

(All of the above to be commercially packed.)

44. Sample of dried apricots. 2.50 1.00

45. Sample of dried peaches. 2.50 1.00

46. Sample of dried pears. 2.50 1.00

47. Sample of dried apples. 2.50 1.00

48. Sample of dried nuts. 2.50 1.00

49. Sample of dried seeds. 2.50 1.00

50. Sample of dried fruits. 2.50 1.00

51. Sample of dried vegetables. 2.50 1.00

52. Sample of dried meats. 2.50 1.00

53. Sample of dried fish. 2.50 1.00

54. Sample of dried eggs. 2.50 1.00

55. Sample of dried butter. 2.50 1.00

56. Sample of dried cheese. 2.50 1.00

57. Sample of dried milk. 2.50 1.00

58. Sample of dried cream. 2.50 1.00

59. Sample of dried sugar. 2.50 1.00

60. Sample of dried salt. 2.50 1.00

61. Sample of dried vinegar. 2.50 1.00

62. Sample of dried oil. 2.50 1.00

63. Sample of dried soap. 2.50 1.00

64. Sample of dried paper. 2.50 1.00

65. Sample of dried cloth. 2.50 1.00

66. Sample of dried furniture. 2.50 1.00

67. Sample of dried houseware. 2.50 1.00

68. Sample of dried toys. 2.50 1.00

69. Sample of dried books. 2.50 1.00

70. Sample of dried stationery. 2.50 1.00

71. Sample of dried jewelry. 2.50 1.00

72. Sample of dried clothing. 2.50 1.00

73. Sample of dried shoes. 2.50 1.00

74. Sample of dried hats. 2.50 1.00

75. Sample of dried gloves. 2.50 1.00

76. Sample of dried socks. 2.50 1.00

77. Sample of dried underwear. 2.50 1.00

78. Sample of dried pajamas. 2.50 1.00

79. Sample of dried nightgowns. 2.50 1.00

80. Sample of dried towels. 2.50 1.00

81. Sample of dried bed sheets. 2.50 1.00

82. Sample of dried tablecloths. 2.50 1.00

83. Sample of dried curtains. 2.50 1.00

84. Sample of dried rugs. 2.50 1.00

85. Sample of dried carpets. 2.50 1.00

86. Sample of dried wallpaper. 2.50 1.00

87. Sample of dried paint. 2.50 1.00

88. Sample of dried varnish. 2.50 1.00

89. Sample of dried glue. 2.50 1.00

90. Sample of dried cement. 2.50 1.00

91. Sample of dried bricks. 2.50 1.00

92. Sample of dried tiles. 2.50 1.00

93. Sample of dried mortar. 2.50 1.00

94. Sample of dried plaster. 2.50 1.00

95. Sample of dried lime. 2.50 1.00

96. Sample of dried sand. 2.50 1.00

97. Sample of dried gravel. 2.50 1.00

98. Sample of dried crushed stone. 2.50 1.00

99. Sample of dried concrete. 2.50 1.00

100. Sample of dried asphalt. 2.50 1.00

101. Sample of dried bitumen. 2.50 1.00

102. Sample of dried pitch. 2.50 1.00

103. Sample of dried resin. 2.50 1.00

104. Sample of dried tar. 2.50 1.00

105. Sample of dried pitch. 2.50 1.00

News of Central California Towns

REEDLEY PAINTER MAKES INVENTION

Rev. H. H. Hoeker Returns to Methodist Church.

Miss Caruthers, the Artist, Leaves on Return Trip to New York.

REEDLEY, Oct. 2.—At the Methodist conference convening this week at San Diego, Rev. H. H. Hoeker was re-appointed to the local church. Rev. Hoeker has been here for several months past, having come from the East to locate Reedley. Interest in all the branches of the church have been greatly increased under his pastorate and all would have regretted his removal to another field. His usual services are announced for Sunday, as the pastor returned from his southern trip on Thursday.

K. H. North, a local painter, has made a discovery which he thinks will prove to be of great importance to members of his trade and to the public. He has for time been experimenting with various preparations in mixing wood dyes, and has found a composition which will give to furniture or any good work a good stain without raising the grain. This Mr. North says gives it a decided advantage over any product now on the market, and he expects to apply for a patent for the preparation.

Miss Laura Corlett and Miss Irma Wright, both June graduates of the Reedley high school, have gone to San Jose to take up a course at the State Normal. They were accompanied by Miss Lena Segura, a graduate of the Duha high school.

Mrs. E. Fowler is planning to leave on Monday for a visit with the Brownstone family in San Francisco. After a few days spent there and with friends in Oakland, she will return to San Jose to attend the W. C. T. U. convention, she being a delegate from the local society.

T. L. Reed is away on a trip to the mountains, where he will get the best of the rights of way for the Sand Creek road. He will return the first of the week.

Mr. Howell, a nephew of J. B. Mooney, who recently came here from the East to spend the winter, has gone to Los Angeles to meet his mother and brother, who have come out for a tour of California. He expects to bring them to Reedley next week.

John Rempel, F. H. Rempel and J. H. Dick were arrivals from Oklahoma on Friday morning. They have relatives here and expect to locate.

Miss Isabel Caruthers, the artist, who has spent the past year in Reedley, left yesterday on a return trip to New York. She stops for a few days in Fresno before resuming her journey.

Woman loves a clear, rosy complexion. Burdock Blood Bitters purifies the blood, clears the skin, restores ruddy, sound health.

Torturing eczema spreads its burning area every day. Doan's Ointment quickly stops its spreading. Instantly relieves the itching, cures it permanently. At any drug store.

Doan's—Regulates—cures—constipation, tone the stomach, stimulate the liver, promote digestion and appetite and easy passages of the bowels. Ask your druggist for them, 25 cents a box.

There's nothing so good for a sore throat as Dr. Thomas' Electric Oil. Cures it in a few hours. Relieves any pain in any part.

Wall Paper

Wouldn't it be a big improvement to your home to have the walls re-papered?

The expense will be small, especially if you buy the paper from us.

Every conceivable pattern and color, suitable for any kind of room.

RECEIVES 30,000 VOLTS, IS ALIVE

Man Comes in Contact With Transmission Wire.

Is Horribly Burned and Will Probably Die; Orange Land High Priced.

PORTERVILLE, Oct. 2.—John Bass, an employee of the Globe Light and Power Company, is still alive at the Mt. Whitney hospital in this city, after having yesterday afternoon come in contact with a transmission wire carrying 30,000 volts of electricity. In the transformer room of the Globe plant a few miles above Springville, Bass is horribly burned and will probably die. As it is, however, his experience is almost unprecedented, as under practically all circumstances a shock of 30,000 volts is sufficient to cause death. Bass, who is about 30 years of age and unmarried, owes his present condition to disobedience of orders. He is a local employee at the company's stable, and repeated warnings have been given the men outside of those employed at the plant, to stay out of the dynamo and transformer rooms. Warning signs are also placed at its doors leading to the plant, forbidding any except the inside employees to enter.

Late yesterday afternoon, for some reason which Bass in his present condition is unable to explain, he went into the transformer room, carrying over his right arm an eight-foot section of inch gas pipe. As he was passing one of the transformers, in which the electricity is "stepped up" from the 2500 volts at which it comes from the dynamo to the 30,000 volts at which it is transmitted to the valley, the pipe came in contact with one of the out-going wires. There was a blinding flash, with a report like that of a shot, and the safety fuses blew out, owing to the short circuit which was created, and every station on the entire 225 miles of the company lines was put out of commission. Bass fell beside the transformer, a charred mass of flesh and with his clothing burning to a cinder. Harry T. Bays, the superintendent of the plant, heard the noise of the fuses blowing out, but thought it one of the accidents which some times happen in the course of a day's work, until he saw a blue cloud of smoke pouring from the windows—smoke which resulted from the injured man's burns. Presuming that the plant had been set afire from some cause, Bays rang the alarm and all of the employees rushed into the building. Bays was found lying on the floor of the transformer room, to all appearances dead. All of the men are coached in emergency work for just such cases, and after a few moments' labor, Bays gave signs of returning consciousness. Medical aid was had from this city and the injured man was brought to the hospital here late last night. Although there is a chance for Bass' recovery, as the result of extensive skin grafting operation, in all probability when the time comes for the removal of the skin, a single blister and the flesh is almost burned from the bones of his right leg and hip. Employees of the plant account for Bass' escape from instant death on the theory that when the pipe which he was carrying came in contact with the wire, the other end formed a circuit with the water pipes at the side of the machine, thus carrying off a portion of the current.

Thirty-eight acres of orange land, partially in bearing, comprising the Sophy grove, north of this city, was sold this week to Long & Bohlin of Evansville, Indiana, for \$25,000. There are eighteen acres of 2-year-old Navels, twelve acres of 4-year-old Valencia and two acres of young oranges in the tract. Possession will be given in thirty days, when the new owners will move upon the tract with their families to make their future home.

Their ranks decimated during the present summer by the activity of Dan Cupid, a reorganization of the bachelor maids' society, "The Girls," has been found a necessity, in view of the fact that only eight of the original members of the society are left. A meeting of the eight was held last night to consider new memberships and elect officers for the coming year. Inasmuch as only bachelor maids are admitted and as matrimony constitutes a bar to the club, but a bare quorum was present. Miss Bessie Vaughn was selected for the new president; Miss Florida Doyle was chosen secretary, and Miss Carrie Wigley will be the new treasurer. Social activities for the present year were also mapped out at the meeting, a theater party and dance being planned for next week.

Forty people were the guests of the Terra Bella Land Company last evening at the reception given for the formal opening of the Terra Bella Inn, the new hotel, which is practically completed at the new town seven miles south of this city. The evening was spent in dancing and refreshments were served. The Terra Bella Inn, which was built as one means of exploiting the lands of the Terra Bella Company, is one of the most up-to-date structures of this sort in the valley, representing an outlay of more than \$25,000.

Fred Ackerman, one of the principal owners of vacant land on Main street of this city, has put an end to an old controversy which has been waged over the title to the alley between Olive and Gardens streets on Main by yesterday fencing up the alley in question and letting the contractor for a cement walk across the opening. War has waged between the city and private owners of this alley for several years, and on one or two occasions the city has resorted to force to keep the pseudo street open to travel. Mr. Ackerman has been advised by what he considers competent legal authority that the title to the street is in himself and on this advice he has fenced it up and put the question up to the municipality. It is probable that this will end the quarrel.

Officers of the Baptist church were elected at a meeting held at the church last evening. H. C. Carr was elected treasurer. Allan Bayne, financial secretary; Mrs. Christian Mueller, organist, and W. J. Anderson, chorister. Rev. Madison Slaughter will continue in the future as the pastor of the congregation.

COUNTY REE MAN

RENDERS REPORT

The county bee inspector, in his monthly report filed yesterday with the supervisors, states that during the month 1111 colonies of bees were destroyed. Thirty-seven were found to be affected with American foul brood and one with European foul brood. Two were killed by moths and fifty-two were on immature combs. The remainder were in good condition.

NEW BUILDING FOR CLOVIS LIBRARY

Committee Is Chosen to Secure Lots.

Packing of Emperor Grapes to Be Started During Coming Week.

CLOVIS, Oct. 2.—A meeting of the library directors was held at the Hotel Tuesday evening. Important business was transacted. Committees for program and refreshments at the annual meeting to occur November 9th were appointed. Committees for securing lots and funds for a new building were also named.

The packing of Emperor grapes at Clovis and Melvin will probably begin during next week. The Earl Company expects to ship about thirty cars from Clovis.

Mrs. Harry Atkinson visited her parents in Hanford, returning Sunday. Her sister, Miss Cornell, returned with her and will probably remain during the winter and attend the High school.

Mrs. J. A. Mason of Academy was a visitor in Clovis Monday.

The reception of the Missionary Society of the Baptist church on Friday afternoon was a successful function. About twenty ladies were present, after a basket of pattern and one locked with a screw. Marshall unlocked the cuffs all right and then asked permission to take them to Talar and other nearby towns as an advertising feature, according to return them in a few days. This was granted and Marshall departed. Nothing was heard of him for several weeks, when it was learned he was in Palo Alto. He was communicated with and promised to forward the cuffs at once. He did not do so and when later located in San Francisco a warrant of arrest was issued.

The local deputy sheriff values the handcuffs on account of their antiquity.

Aside from destroying the dry feed, of which there was much in some localities, the rain has done comparatively little damage, so far as learned, in this county. The lowering clouds of several days gave ample warning to farmers and ranchmen and, for the most part, were caught with the fruit unstacked on the drying ground.

Today, Emperor and other table grapes still on the vines are not injured, it is reported, but the crop should a frost fall would be a total loss.

Some hay was caught by the rain and some damage will result thereby, but much of this was stacked prior to the storm.

Plans are being rapidly shaped for the erection of the new Episcopal church on the site of the present building at Center street and Kincaid avenue. Subscriptions are coming in satisfactorily, backed by a loan of \$2000 from the general church fund. The present building will be enlarged and a parish house constructed adjoining it on the east.

It is hoped to have it in readiness for Christmas services.

Jason Barton announced today the erection of a hotel-above Three Rivers in time for next season's mountain travel. The hotel will be situated at the foot of the Giant forest and Mineral King roads, where is located a mineral spring.

An extension of the Visalia electric railroad to this point has been contemplated for some time and seems likely to be a reality at no distant date.

Pack trains for trips into the Kings river canyon will be had at the hotel. The hotel will be quite an elaborate structure, according to the plans drawn, and the lumber has already been ordered.

A fifty-pound watermelon was brought to this city today from the Randolph Muller ranch near this city. It is one of the largest melons ever exhibited locally.

Many hunters left this evening for the lake and others will follow tomorrow in the wake of the first duck shooting reported from that locality. Several of the local best-laid team returned this morning laden with wild fowl.

Rev. W. A. Bonner will leave Monday for San Jose to attend the annual conference of the M. E. church. Sunday Rev. Bonner has been the local pastor for the past three years and it is likely he will be returned for a fourth.

HAMBURG EXPORTS

HAMBURG, Oct. 2. The exports from Hamburg to the United States and the Philippines for the first nine months of 1909 aggregated \$17,472,216, an increase of \$2,875,292 for the corresponding period of last year. The exports to the Philippines for the first nine months of 1909 amounted to \$903,927.

"HANDCUFF KING" GETS OUT OF JAIL

Digs Up Visalia Officer's Cuffs, Freed.

Visalia Deputy Sheriff Uses Criminal Process to Recover Property.

VISALIA, Oct. 2.—Deputy Sheriff Dave Douglass of this city, who caused the arrest of Marshall, the "handcuff king," in San Francisco yesterday because the latter "forgot" to return handcuffs borrowed here, this morning received a telegram from the San Francisco police department stating that the cuffs were in the possession of the police.

Marshall declared the cuffs were in Oakland and was released on \$25 bail upon his promise to produce them. This he did this morning.

Douglass then issued a dismissal of the charge of embezzlement to be issued and the case will be dropped. The cuffs will be sent down from San Francisco by the police department.

While Marshall was exhibiting at a local theater some weeks ago Douglass expressed the belief that he had at least one pair of cuffs that the "king" could not get out. They were of peculiar and antiquated pattern and one locked with a screw. Marshall unlocked the cuffs all right and then asked permission to take them to Talar and other nearby towns as an advertising feature, according to return them in a few days. This was granted and Marshall departed. Nothing was heard of him for several weeks, when it was learned he was in Palo Alto. He was communicated with and promised to forward the cuffs at once. He did not do so and when later located in San Francisco a warrant of arrest was issued.

The local deputy sheriff values the handcuffs on account of their antiquity.

Aside from destroying the dry feed, of which there was much in some localities, the rain has done comparatively little damage, so far as learned, in this county. The lowering clouds of several days gave ample warning to farmers and ranchmen and, for the most part, were caught with the fruit unstacked on the drying ground.

Today, Emperor and other table grapes still on the vines are not injured, it is reported, but the crop should a frost fall would be a total loss.

Some hay was caught by the rain and some damage will result thereby, but much of this was stacked prior to the storm.

Plans are being rapidly shaped for the erection of the new Episcopal church on the site of the present building at Center street and Kincaid avenue. Subscriptions are coming in satisfactorily, backed by a loan of \$2000 from the general church fund. The present building will be enlarged and a parish house constructed adjoining it on the east.

It is hoped to have it in readiness for Christmas services.

Jason Barton announced today the erection of a hotel-above Three Rivers in time for next season's mountain travel. The hotel will be situated at the foot of the Giant forest and Mineral King roads, where is located a mineral spring.

An extension of the Visalia electric railroad to this point has been contemplated for some time and seems likely to be a reality at no distant date.

Pack trains for trips into the Kings river canyon will be had at the hotel. The hotel will be quite an elaborate structure, according to the plans drawn, and the lumber has already been ordered.

A fifty-pound watermelon was brought to this city today from the Randolph Muller ranch near this city. It is one of the largest melons ever exhibited locally.

Many hunters left this evening for the lake and others will follow tomorrow in the wake of the first duck shooting reported from that locality. Several of the local best-laid team returned this morning laden with wild fowl.

Rev. W. A. Bonner will leave Monday for San Jose to attend the annual conference of the M. E. church. Sunday Rev. Bonner has been the local pastor for the past three years and it is likely he will be returned for a fourth.

TAFT INTERESTED IN Y. M. C. A. WORK

To Lay Corner Stone of San Francisco Building

Says Men of Wealth Can Do No Better Than Help This Institution.

In his Western whirlwind trip, President Taft took time to dedicate the new Association building at La Crosse, Wis., and will lay the cornerstone of the new \$200,000 San Francisco Association building October 5. He has not yet before leaving Beverly was to send his check to start a building fund of \$100,000 and a card of letter to the Association there. A "fact" of 2,000 young men has been organized to carry on a vigorous campaign for the funds. They expect to have it all secured and that the President will lay the cornerstone of the building next summer. The President in his address at La Crosse told men of wealth that they could do no better thing than to put money into Y. M. C. A. buildings. He said: "When I am invited to testify to the advantages of the Young Men's Christian Association to the community I feel that I should be neglecting my duty as a man if I did not bear witness to the great work of this Association, as I have seen it, in aiding young men and making them valuable members of the community."

"In Omaha, in Seattle, in Shanghai, in Hongkong and Manila, as well as in many other places around the world, I have seen this good work. On the Isthmus of Panama, we are using today four of these general societies trained to organize our Association there to help the young men who are working in the tropics and to protect them from the dangers and temptations that beset young men, especially in the Orient and the tropics. Young men leaving their homes in the country and coming to this city and away from home influence, among strangers, they do not know where to go for good amusement. It is under these conditions that the Association does some of its best work. It furnishes the young man a club, a place where he can go and find the things that young men enjoy, and at the same time he does not feel himself subject to charity. "A thing I like about the Young Men's Christian Association is that it teaches men how to spend money economically, to accomplish the greatest amount of good. Those who give may be satisfied that their money is being spent in a way that is economical and that will bring results. They may be certain that the money is helping to create a higher class of citizens, who are better members of the community for the help that they have received."

ANSWERS CHRISTIAN SCIENCE CRITICISM

Says Persons Should Not Be Deprived of Rights Because They Think Wrong.

Editor Republican:—In your issue of September 25th appeared a criticism of Christian Science in which the question is asked, "Shall we deprive these persons of the right to think for themselves merely because on these subjects they do not think as we do?" For this is what the critic's query really amounts to. If such a question could be properly answered in the affirmative, we should have a repetition of the dark ages; we should return to those times of barbarism when the great service of mankind was crucified because the high priests said, "He does not think as we do."

The question might better have been asked, "Shall we deprive these persons of the right to think for themselves merely because on these subjects they do not think as we do?" For this is what the critic's query really amounts to. If such a question could be properly answered in the affirmative, we should have a repetition of the dark ages; we should return to those times of barbarism when the great service of mankind was crucified because the high priests said, "He does not think as we do."

Every advance in the interest of humanity has been caused by some heretic who had the courage to "not think as we do." Thousands of intelligent, thinking people have become Christian Scientists because of the failure of the established systems to give them help in a time of need. They have found in Christian Science a satisfying religion whose God "forgiveth all their iniquities, who healeth all their diseases." The constitution of this country guarantees religious liberty and because of this, the Christian Scientists have sufficient confidence in their belief to hold them from sickness as well as sin, their fellow Christians should not seek to deprive them of their right to worship God according to the dictates of their conscience.

The fruits of Christian Science in healing the sick and suffering, in transforming unbelievers into earnest followers of the Master, prove that Christian Scientists do not think wrong, but are in the company of those who are approaching the standard established by Jesus, who said, "He that believeth on me, the works that I do, shall he do also."

Sincerely yours,

WILLIAM E. BROWN.

FRESNO IS HONORED BY MASONIC ORDER

Local Lodge Invited to Put on Second Degree Work Before Grand Lodge.

Fresno Lodge No. 247 E. & M. has been invited by the grand lodge of California to exemplify the work of the second degree before that body during its session on Monday evening, October 11, at 8 o'clock, at King Solomon's hall, 1724 Pierce street, San Francisco. The following officers will participate in the ceremony: Charles Edwards, E. E. Hornlund, George Marks, Elzerio Levy, E. Grant, T. J. Hammond and A. B. Allen. A good representation from Fresno county lodges will be present.

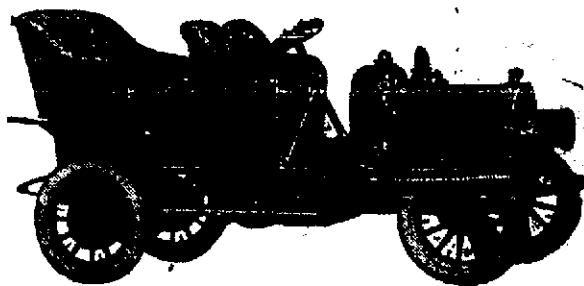

On Tuesday at 2:30 p. m., the grand lodge of the new Scottish rite cathedral, at the corner of Van Ness avenue and Sutter street. When completed it will be an imposing structure costing about \$500,000.

Friday evening at King Solomon's hall La Parfaite Union No. 17 (French Lodge) will confer the first degree.

MUCH TIMBER IS GIVEN AWAY FREE

The forest service grants a large amount of timber free of charge to homestead settlers, miners, and prospectors in the vicinity of the national forests in the state for fire wood, fencing, building, mining, prospecting and other domestic purposes. Each settler may obtain \$25 worth of this material annually by applying to the nearest forest officer.

District Forester Olmsted has compiled a statement which shows the amount of timber so granted during the year ending June 30, 1909, to have been 4,583,147 feet board measure, having an estimated value of \$14,262.20.

BUICK MODEL 17

\$1900 F. O. B. Fresno

This is the car which has been lowering world's records for stock cars until it has become monotonous. The last occasion was the big road race on Long Island, September 29th, when the Buick, with Chevrolet up, made 113 miles in 97 minutes, an average of 70 miles an hour—a new world's record. Another Buick, with Bob Beerman at the wheel, was second. One of the fastest stock cars in the world and an unequalled hill climber.

BLAMES HITCHCOCK FOR LACK OF FUNDS

Fairweather Says Officers Are Not to Blame for Condition of Reclamation Service.

Editor Republican:—In your editorial on the reclamation service and other public matter you have done as other editors have done, put too much stress on the condition of the service by referring to the financial condition of the funds, and adding that too much difficulty at work has been started with the funds on hand.

All the criticism is laid on what is called the reclamation service, meaning the officers doing the real work in the field. E. H. Newell, who is the chief engineer of the work now going on, has been blamed for bringing the present state of affairs to its present position. We earnestly believe and further feel that we know Mr. Newell is not to blame for the present condition of the reclamation funds.

Mr. Newell opposed work now going on, even to refusing to make surveys, and this has brought the people to refer to him as a hindrance to progress. In many instances the people in Idaho, Montana and Washington have said very hard things of Mr. Newell. They have in some instances used language that would not look well in cold type. Mr. Newell saw the outcome with present funds if all this work was started, and when he refused to go on the ground the people sent committees to Washington to see the secretary of the Interior, Hitchcock, and pleaded with him for just a survey. "Just give us a survey so we may know that the thing is feasible and then we will wait."

The secretary, being a good natured old man, would take sides with them and advise a survey. But you, Mr. Editor, and many of us know such things not only as an entering wedge and lead to further progress, but also a different committee has to be sent a second time to urge the secretary to start the work in a small way. Such pleadings have their effect and difficult works have been commenced that should have awaited their turn, hence the necessity of what is now considered by the senatorial committee and taken up by President Taft.

We believe that in the foregoing we have given a true statement of the condition of the service as it is today. Having come in contact with Mr. Newell, Mr. Davis, consulting engineer, and many other of the members of their staff we might mention at the several national irrigation congresses in the past we have seen in advance what would be sure to follow if so much difficult work was started.

You know we are not slow at asking questions. And by so doing we have gained considerable information on the subject.

Because of this knowledge I offered a resolution at the last congress at Spokane, asking of the national congress at Washington an appropriation at its next session. The resolution committee went further, however, and asked for \$100 million dollars, or ten million dollars a year for five years.

S.S.S. CURES RHEUMATISM

Every person who suffers with Rheumatism knows of some liniment, plaster, or other external application that may afford temporary relief from the pain of an acute attack of the disease. Such treatment, however, is in no sense curative—it simply gives ease for the time being, by counter-irritation at the spot affected, as the attack is sure to return at some future time. In this article we want to talk with you about S.S.S., a medicine that CURES Rheumatism, a remedy that removes the cause, and in this way assures the sufferer of permanent freedom from this painful and health-destroying disease.

Rheumatism is due to a diseased condition of the blood, brought about by an excess of uric acid in the circulation. This uric impurity gets into the blood usually because of constipation, poor kidney action, indigestion, and other minor stomach disturbances. These physical irregularities may be so slight, and at such prolonged intervals as to give us slight concern; but each one has a distinct influence on the eliminative members of the body, and prevents the proper removal of the impurities from the system. This refuse remains in the stomach and bowels, and souring, forms uric acid, which is quickly absorbed into the blood.

Then the circulation becomes weak and sour, the corpuscles, which ordinarily furnish nutriment to the body, are saturated with the uric acid, which they deposit into the muscles, nerves, bones and joints. This causes soreness and inflammation, and brings on the pains and aches of Rheumatism. No longer does the blood nourish every ligament of the body with healthful properties, but constantly the briny, inflammatory circulation distributes the uric impurity throughout the system, and Rheumatism becomes chronic. The occasional pains shooting through the muscles, or shifting from joint to joint, become more frequent and severe, the muscles get sore, the flesh becomes feverish and inflamed; and constant contact with the acid blood slowly dries up the natural fluids of the joints, stiffening the knees, ankles, fingers, etc.

There is but one way to cure Rheumatism, and that is to cleanse the blood of uric acid poison. S.S.S. goes into the circulation, and attacks the disease at its head, and by removing every particle of the cause, and thoroughly purifying the blood, cures Rheumatism permanently. S.S.S. changes the blood from a sour, acid-steeped stream to a rich, healthy fluid, which quiets the excited nerves, eases the throbbing, painful muscles and joints, cools the blood tissues, and reduces all inflammation of the flesh. When the blood has been purified and enriched by S.S.S., it gradually nourishes back to a healthful state the different members that have been starved and weakened because of imperfect, diseased blood. S.S.S. is purely vegetable and contains no harmful minerals of any kind.

We have a special book on Rheumatism, which we will send, together with any special medical advice desired, free.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

WHY LEGAL MAXIMS BECAME NECESSARY

Writer in California Weekly Tells of Their Origin; Many Other Features This Week.

The week's issue of The California Weekly contains an admirable article on "Origins of Revised Legal Maxims," by Warren Olney, Sr., the distinguished member of the San Francisco bar. In this article Mr. Olney describes the circumstances under which these maxims, such as "a prisoner shall be presumed innocent until proved guilty beyond a reasonable doubt"—became a necessary part of the law to defend prisoners from the harshness of the law and of public sentiment. The article further shows how, by the change in public sentiment toward prisoners, the maxims of this and many other maxims, have become a means to justice. In "Training the Fire-Fighters" are described the thrilling exercises that fit the raw recruits for saving life and property. Arthur J. Pillsbury's story of a journey into the valley of the "Sandlapper" is forwarded by three chapters of great interest. A. J. Waterhouse fills his department "As the World Wags," with wit and humor and homely philosophy. The other departments and the editorials gain in interest and strength with each issue.

UNITARIAN PULPIT.

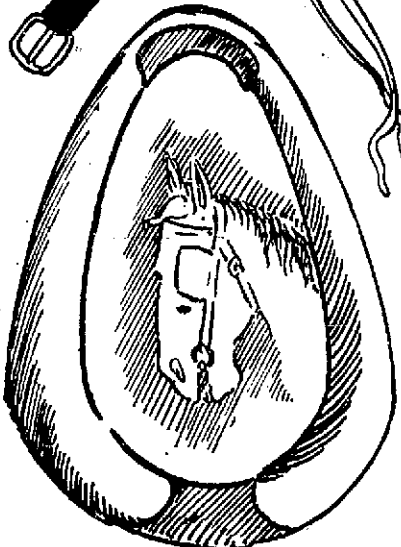

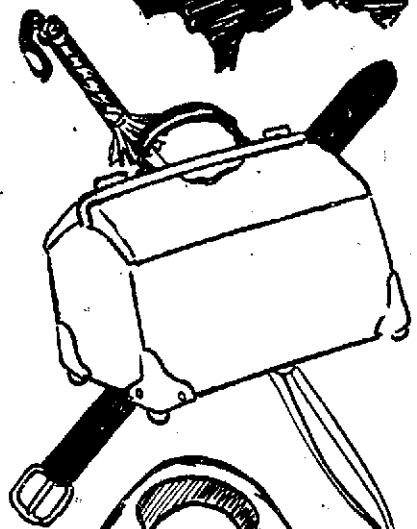

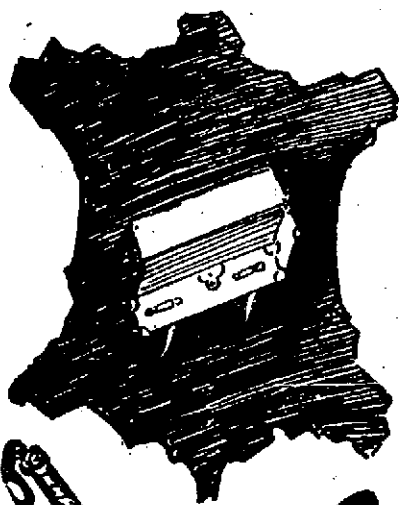

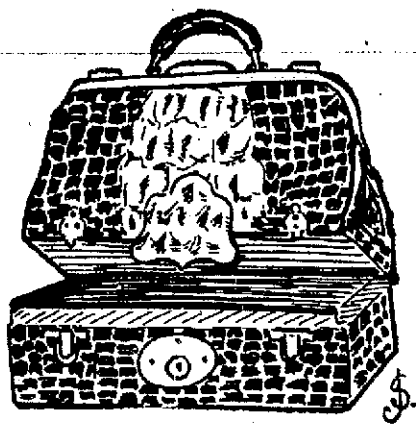

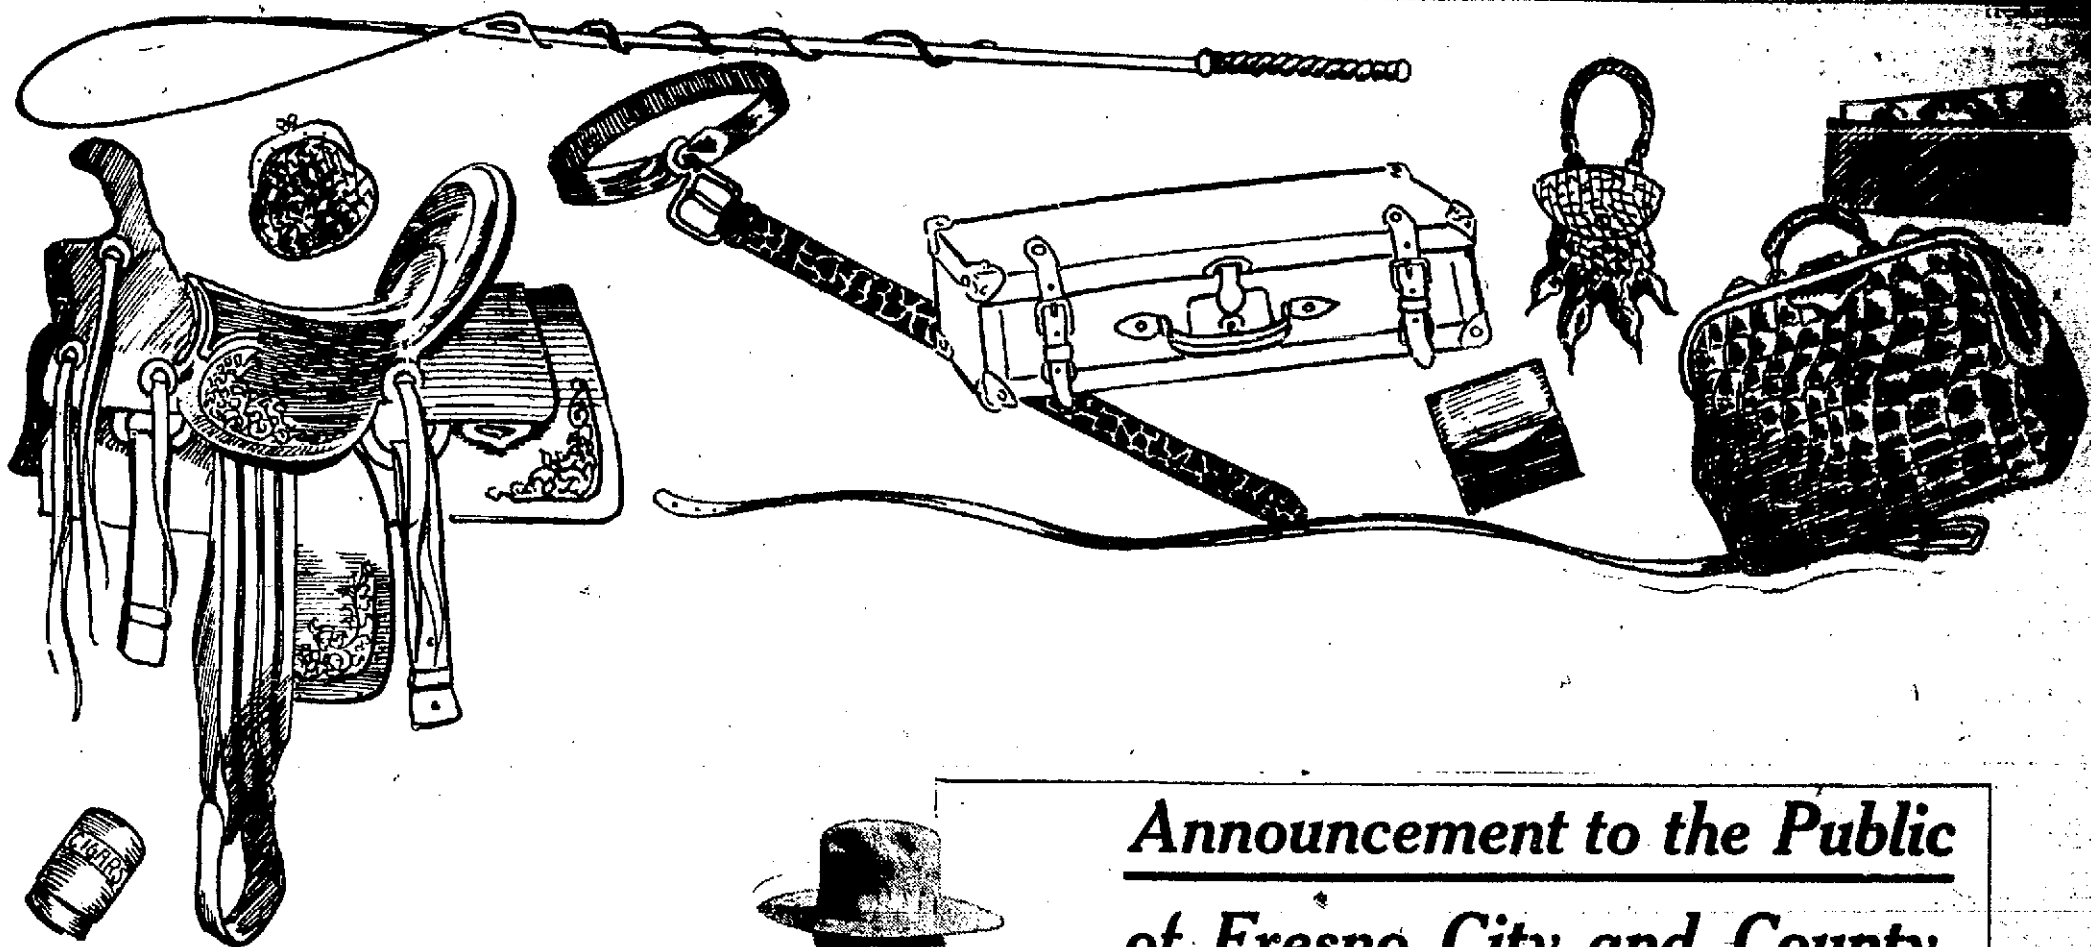

The Growth of Life. Life things grow; dead things do not. A stone remains ever the same, but a plant constantly changes and develops. And the man who makes no use of the fact that his religious conception has not undergone any change of development is in reality making confession of its lack of the force of life. Where religion is something living, vital, real, there must necessarily be change of view from time to time. The man who camps out in the valley of the same scene, but the one who moves ever on and up confronts new things. There is no new day of progress; there is no gain where there is no growth; there is no profit where there is no progress. At the Parish Lecture Club that tonight my free lecture will be on "Progress." You are invited. J. A. CRUZAN, Field Agent.

FINE MENU AT HUGHES HOTEL

The following menu will be served in our American plan dining room Sunday evening, October 3rd, 8:30 to 9:30, with one-half price. A. V. Colony and white wine included:

Chocolate Ice Cream
Watermelon
Lemon Meringue Pie
Fruit
Assorted Cake
Coffee

Dr. Palmer, Osteopath, 35 Fluke Ridge Phone Main 503 Selma, Turkeys and Saturdays.

Announcement to the Public of Fresno City and County.

I wish to announce to the people of Fresno City and County that I have decided to retire from the Harness and Leather Goods Business, as interests elsewhere need all my attention.

Consequently, I will start a retiring sale on the fifteenth of October. And, in order to make a quick clearance, I am going to sell all my Harness, Saddles, Whips, Robes, Blankets, and other Saddlery Goods of every description, kind and character; as well as Trunks, Suit Cases, Bags, Hand Bags, Purses and other Leather Goods of all kinds in my possession at actual cost prices until completely sold.

Having conducted a business in Fresno for nearly twelve years (during which time I have built up a retail Saddlery business that is second to none in the state of California, which has been done through the confidence that the public in this locality has had in my goods and methods) I now wish to emphasize, and want everybody to understand that this is a strictly bonafide sale. No "flim flam." No "humbug". Everything to be done exactly as advertised.

I am going to consolidate the stock from my Stockton store with the Fresno stock for this sale---making from \$40,000 to \$50,000 worth of goods to be offered at a sacrifice to the public at prices never seen or heard of before in this line in Fresno County.

I am obliged to take about \$5,000 worth of Leather Goods from the eastern factories, which were ordered made---some to my special design---in the early part of the summer for the fall trade, before this step was decided. These shipments will arrive from time to time and will be sold with the stock on hand, upon their arrival at cost.

I have no out of date or shopworn goods to throw onto the public. Everything sold will be of that high standard of quality, which has marked our store in the past. Everything will be absolutely as represented. I will try to conduct this sale in the same manner and with the same integrity that I have conducted my business in your midst for the past twelve years.

My store will be closed Oct. 11, 12, 13, and 14 so as to enable me to arrange the stock and mark down the prices.

Remember the sale starts Oct. 15th! Wait for the bargains! and watch the announcements in the papers from time to time until that date!

SOCIETY

Dr. Minerva Kev Chappell, a bride of the week.

Society is all of a flutter this week with the stir of wedding preparations for the approaching nuptials of several fair brides. Aside from the festive attendance upon the wedding socials, activity has not lately been. Many have not yet returned to town and things are in rather a chaotic condition, but it is expected that the present winter is to be one of the gayest Fresno society has known. A great deal of entertaining is being planned, both formally and informally, and many homes which have hitherto been rather quiet are to be opened for social gaieties.

The immediate future holds several weddings of absorbing interest. A bride about whom a great deal of interest centers is Miss Grace Shaver, who weds Dr. Henry Chappell on Wednesday evening. The Shaver family home on Stanislaus street is to be the scene of the wedding. The weather permitting, the ceremony will take place out of doors. Only the most intimate friends of the two families have been bidden to the marriage through informal invitations. Miss Ethel Shaver has come home from Stanford University to attend her sister as maid of honor. There will be two little ribbon bearers and Miss Janet McKinnon will be the ring bearer.

Numerous beautiful gifts have already been showered upon this fortunate young bride-to-be, and will form beautiful adjuncts to the cozy home which she will occupy after her marriage just opposite the Shaver home on L street.

The Prather-Chappell nuptials on Wednesday evening will be solemnized at the home of the bride's mother on Abbey street very quietly and unostentatiously. There is quite a large family connection on both sides, so that there will be few guests outside of the family circle. This popular bride has been charmingly feted by her friends and much interest is felt in her marriage. Her sister, Miss Emma Chappell, is to be her only attendant.

A Tuesday wedding of widespread interest will occur at the First Baptist church and will unite Miss Elma Evans, daughter of Mr. and Mrs. A. B. Evans, and Clinton Miller, of the prominent young people of this city and prominent in Baptist circles. The prospective bride is a most attractive girl. For the past year or two she has attended school in Oakland and in her first year at home the romance began which will culminate in the wedding. Mr. Miller is very prominent in Y. M. C. A. affairs and in church circles as well. He is a musician of exceptional ability and is always in demand at social gatherings. They both have hosts of friends who have been making the weeks before the wedding very gay ones. In addition to the bridesmaids and ushers, there will be two little flower girls in attendance, Laura Pratt and Doris Barr. A supper at the Evans home for the wedding party will follow the church service.

W. D. Coates, Jr., is down from San Francisco for a few days' visit with his parents, Mr. and Mrs. W. D. Coates on Van Ness avenue.

Mrs. Noyson and her daughter, Miss Belle Noyson, are recent arrivals in Fresno from Boston. Miss Noyson is associated with Miss Houston in kindergarten work in the public schools and is an exceedingly clever, interesting girl.

General and Mrs. M. W. Miller are expecting their daughter, Mrs. Frank Ryan, and her small daughter from Los Angeles next week. Mrs. Elliott of Seattle is still with her parents and will remain until after her sister arrives. Her small son has been receiving quite as much attention as his charming young mother, and is the pride of his fond grandfather's heart, especially as he bears his name, Matthew Elliott.

Mrs. Ira Bennett and Mrs. Louise Brannan of Sanger spent yesterday in Fresno.

Mr. and Mrs. Thomas W. Patterson leave for San Francisco tonight to be gone several days.

Mr. and Mrs. George Hume returned on Friday night from a summer's trip abroad, during which they visited Russia and friends through Scotland and England. They returned via the Canadian Pacific, stopping at the Seattle.

exposition for a day or two. Their trip was one of pure pleasure, but they are delighted to be at home again among their friends and are receiving a very warm welcome.

The Ann Clark chapter, D. A. R., will meet next Friday afternoon with the regent, Mrs. S. L. Wiley. An invitation is extended to all eligible to membership to attend this meeting.

Mrs. W. R. McIntosh returned late in the week from Los Angeles and will once more assume her duties as president of the Y. M. C. A. Auxiliary.

Mr. and Mrs. Monroe C. Chance expect to move early this week into The Palace, where they will be guests during the winter.

Mr. and Mrs. George Hoxie have leased their Blackstone avenue home to the George Hoxies during the first of November and will occupy an apartment at the St. Andrews.

Club affairs in Fresno this winter are to be of paramount importance because of the fact that the Parlor Lecture Club has its new club house. The new building has greatly stimulated club activity in various ways and means a long stride forward in progressiveness. For the last three or four weeks the dear ladies who have had the building of the club house in charge have been hard at work making the new club home ready for the reception which will be held next Thursday evening and which marks the formal opening of the club house. Already it has been used for committee meetings and otherwise and the demand made by centers is eloquent proof of the first need of such a building. Not only have various organizations engaged the club house for the winter, but a number of individuals are planning to entertain here on an extensive scale.

The work of finishing and furnishing has been tedious and the committee has been working there early and late, doing the hundred and one little things that require personal inspection.

There is to be quite a lot of responsibility connected with the running of the club house after its opening, but this part of the club work will be very practically managed and in a few weeks every thing will be running with the regularity of clock work, thanks to the splendid management of the capable committee in charge. Mrs. George Hoxie, the chairman, has given a great deal of her time to the building, and it is largely due to her untiring zeal that the enterprise has turned out to be such a success. The fund agreed upon to erect the building has not been large and every dollar has been made to count in a surprisingly effective manner.

The other members of the committee who have given the chairman the benefit of their ideas and have co-operated heartily with her in every detail are Mrs. J. S. Jones, Mrs. W. S. Sherman, Mrs. A. B. Clark, Mrs. Charles W. Patterson, Mrs. C. L. Warlow, Mrs. O. L. Rivers. This committee will constitute the reception committee next Thursday evening, together with the president, Miss Lucy Hatch.

It is to be an exceedingly brilliant event socially. Invitations have been sent to all ex-members of the club and members of the other clubs as well as to those who have donated articles to the new club house.

The year looks for the club are not to be out until next week, but there is an excellent program offered, including four lectures from Mrs. Lou V. Chappell. This gifted lecturer was to have come to the club last year, but ill health made it impossible for her to continue her work and it was with the greatest pleasure that she would come for a series of lectures this year upon popular subjects. Mrs. W. P. Miller is also to give a day and the various department have interesting plans for the year.

One day will be devoted to the celebration of the club's fifteenth anniversary. Other lecturers than those announced will be engaged during the year.

Mrs. S. L. Wiley has charge of the art department and will lead the members in a systematic art course arranged by the National Art Association, of which she is a member. It is in every respect the same course that is given in the State University and means real serious study along artistic lines. The department is enthusiastic

in its work and the outlook for the year is most cheering.

Mrs. H. W. Neeley has some interesting plans for the library department, of which she is chairman, and these meetings will begin as soon as the class can be reorganized.

Mrs. D. B. Allison is in charge of the music committee. The musical society is an important branch of this work and adds a great deal to the club gatherings.

The home department is under the capable guidance of Mrs. H. D. Carver and is looking forward to some pleasant social occasions this year.

Mrs. H. C. Warner will preside over the civic improvement section, and Mrs. J. C. Pottle will look after the philanthropy department of the club.

Mrs. L. P. Swift, Mrs. J. S. Jones and Mrs. T. J. Hammond have arranged the program for this year.

The Wednesday Club has mapped out a rather strenuous year's work. At least to the uninitiated it seems strenuous, but when one realizes the number of clever and serious-minded women who compose this club, the program is not so surprising, and, moreover, indicates a wonderfully progressive spirit in its members.

Psychology is to play an important part in the program, there being no less than six days devoted to this subject in which Mrs. George Babcock will lead. She is well equipped to conduct this branch of the study and the club is anticipating some very profitable work under her guidance.

Mrs. W. P. Miller, of course, is to lead the club in Shakespeare and Browning as formerly, and also give one or two of the Greek dramas. The modern drama is also to be dipped into rather considerably—in fact, there is to be a well rounded program for the club's delectation.

The club officers this year are as follows: President, Mrs. George Babcock; vice-president, Mrs. C. E. Spear; secretary, Mrs. W. T. Barr.

The Friday Study Club will continue Shakespeare work with Mrs. Miller, take up the Agamemnon Trilogy and have one or two Browning days, besides the days of comparative study bearing upon the Shakespearean plays. Which is a most enthusiastic group of bright women who study seriously and who appreciate to the full the privilege of study under such a leader as Mrs. Miller. They are active in their work, loyal to their club and increasingly interested in the study which has been chosen for the year, so their lives are very full so far as club work is concerned.

Mrs. Henry Hawson is the president, Mrs. Charles Jenney, vice president, and Mrs. J. H. Pierson, secretary.

Interest in affairs musical is to be revived and stimulated through the opening of the Fresno Musical Club, which holds its first home day next Saturday afternoon in the new Parlor Lecture Club assembly hall. The securing of this splendid hall in which to hold meetings has solved a number of difficulties for the club and a most brilliant season is being eagerly anticipated. The action recently taken is increasing rapidly and more and more is the club growing to be what it should be—the representative of the best musical talent of the city. Through the earnest endeavors of a few faithful ones the club has grown and prospered and is worthy of the heartiest support of every citizen interested in the general culture of our city. Its influence on the young music students is already being widely recognized and its fostering of the best in musical art is worth a great deal, not only to every member but to the community in general.

Mrs. Johnson Gay Rhodes is the club's presiding officer and the program this year has been arranged by the following committee: Mrs. Montgomery Thomas, Mrs. Tessie Huber and Mrs. E. B. Waterman. The year books will be ready before the opening of the club and show an excellent offering of music for the year, both locally and from artists from abroad.

The first home day will be unique in its program of selections from the Welte Mignon piano, a remarkable device for reproducing mechanically piano performances by the world's greatest artists. The instrument is no ordinary piano player, but something far more perfect in its interpretation, tone and touch. The following description gives a more adequate idea of its perfection:

The field of musical instrument making, which has shown such an enormous development during the past few years, has again been enriched by a new invention which marks an epoch in musical history.

The "Welte Mignon" is the name given this marvelous instrument, and is made by the celebrated M. Welte & Sons, in Germany. Its mission is to furnish an exact reproduction of the playing of the world's great masters of the piano, not by means of the phonograph, but on this piano itself. This is accomplished through the medium of a perforated music roll made by the direct playing of the artist. During the performance of the piano he or she plays on an ordinary Grand piano. This is connected with specially constructed, very delicate appliances, which register and retain the playing with all the varying characteristics, all the individual qualities of interpretation, tone and touch peculiar to the performer. The playing of the great living pianists is thereby registered and preserved for all time as originally played, and can be reproduced with absolute fidelity and precision now and in all generations to come.

The "Welte Mignon" will therefore not only be the means of perpetuating the work of the great pianists but its value will also consist in its eminently instructive influence on the piano student. At the same time its advantages are incalculable to those desirous of procuring at will an hour of artistic enjoyment of the very highest standard.

An instrument has been especially shipped from San Francisco for this occasion. Mrs. Montgomery Thomas will introduce the program of instrumental music with some charming songs.

An artist concert is soon to follow the opening of the club, Anna Miller Wood, the artistic contralto, being the attraction on the evening of October 14th. This singer is a universal favorite on this coast and has gained a reputation for superiority wherever she has sung. Another early winter attraction will be the appearance of Karl Grenander, the world-famed cellist, who will appear before the club in November. He was to have been here last year, but was unable to appear. This year he has been living in San Francisco and arrangements have already been made for his appearance. George Hamilton, as great in the category of tenor singers as Grenander is among baritone, will also appear appearing before the club prior to the holidays. With such artists already assured and other interesting dates pending the musical outlook is indeed a cheering one.

The Query Club has an interesting program of study mapped out for the coming winter. Mrs. W. P. Miller leading the club again in its study of Shakespeare, Browning and several biblical subjects. The supplementary days after devotionals will be for the earnest student and there will be several days on the modern drama.

which the club was anxious to dispense. It sets aside a day of the club in the absence of its president, and each year sends boxes for its usual study session on costumes, clothes and household things to the 11th with Mrs. H. Z. Adams. Mrs. Hoxie's country. This year Mrs. Miller will be present to lead in the study of the club's history. The study of this year is as follows: President, Mrs. Louise Broth; secretary, Mrs. Madison Club held its first meeting last Friday with the president, Mrs. George Kalsor; treasurer, Mrs.

Staub, the president, who has arranged a special day of welcome for the club. There is a domestic science course to be a part of the winter's study in this club, where practical subjects form an important feature of the club work. The day is to be devoted to the history of Fresno county and there will be other special days during the year.

The Leisure Hour Club will hold its first session for the season with the president, Mrs. F. M. Lane. This will be President's day, and an especially interesting afternoon's entertainment has been arranged for the occasion. The study of Shakespeare, Browning and Tennyson will occupy the club members, who will study under the tutelage of Mrs. W. P. Miller. The celebration of the club's fifteenth anniversary will be one of the features of the year and there will also be a day devoted to California poets. The following are the club officers: President, Mrs. F. M. Lane; vice president, Mrs. M. S. Webster; secretary, Mrs. B. W. Doyle; treasurer, Mrs. J. C. Burgess; librarian, Mrs. E. D. Edwards; critic, Mrs. C. J. Smith.

Miss Elma Evans, whose marriage to Clinton Miller will be solemnized on Tuesday night.

Mrs. Louise Broth. It was the usual Mark T. Meetings are held fortnightly, all-day session, the club members sitting down to a very charming luncheon table at noon to enjoy a feast of dainties. Last year the club agreed to furnish a room in the new Y. M. C. A. building, which was at that time to have been built. During vacation each member was to earn a dollar towards this object and at Friday's meeting stories were related as to how the money was earned. This provided a very jolly form of entertainment and with unexpected interest and enthusiasm the afternoon was a most delightful one. This club, besides its regular study, finds time to do considerable philanthropy.

The West Park Thursday Club holds its first meeting for the season this evening, Thursday with Mrs. H. W.

have described, and they are quite fresh and blood-bringing. Women men have become, older and be."

The next theme after tonight, will be October 15th, "The Ideal Young Woman from the Viewpoint of Fresno County Young Men." The next theme will be sent to them as home has meant to young ladies this week.

ELECTROCUTED MAN TO BE BURIED HERE

The body of H. Ferrell, an electrician who met death by coming in contact with a live wire on September 26, in Richmond, was brought to Fresno last night for burial. The funeral services will be held at 10 o'clock this morning from the undertaking parlors of Stephens & Bean, under the auspices of the Masons. Interment will be in Mountain View cemetery.

Mrs. Ferrell, widow of the deceased, with their four children, accompanied the body to this city. Mrs. Ferrell has relatives in this city.

CITY FIRE RISKS ARE INVESTIGATED

W. S. Duval, district secretary of the Board of Fire Underwriters, and R. L. Halsey, inspecting engineer, have been in Fresno for the past two days making an investigation of the fire risks in this city.

The commissioners were busy in the country on Friday, but yesterday they were shown about the city by Fire Chief Wintemute and Chief of Police Shaw. An examination of the entrances of several of the buildings in Chinatown was made.

The commissioners state that they are simply on their regular annual tour of inspection and that no immediate changes are contemplated as the result of this visit to this city.

GIRLS DESCRIBE IDEAL YOUNG MAN

One Hundred Per Cent Say He Should Be a Christian of Some Kind.

Rev. H. A. Morgan, pastor at the Christian Church, Fowler, will this evening give the first of a series of "lecture-sermons" on "The Ideal Young Man, from the Viewpoint of Fresno County Young Women."

The pastor sent out hundreds of cards to young ladies with a list of questions for them to answer, describing the "Ideal Young Man" from their personal viewpoint. From about two hundred answers already handed in following are some of the statistics they furnish:

To the question "Shall the ideal young man be a Christian?" 100 per cent. of the young ladies say he shall.

To the question "Will he dance?" 75 per cent. say he will not.

To the question as to the "ideal profession or vocation," the answers are scattering, but many say "it doesn't matter."

As to whether he shall be a high school or college graduate, 80 per cent. say that he shall.

Asked whether he "shall be judged by the same standard, morally, by which young ladies are now judged," 87 1/2 per cent. say that he shall.

One young lady, after saying that the ideal young man would not use tobacco or liquor in any way, nor would he play cards pool or dance, but that he would be a college graduate (if possible) and a good Christian, concluded with the following remarks: "I do not think my standard is too high, because I know of several young men of my own acquaintance, who are all of worst."

PERSONAL MENTION

Mr. and Mrs. Joseph Hauer of San Francisco arrived in Chico last night in their touring car where they will remain as the guests of Mrs. J. P. Carpenter and then continue their trip to the southland.

L. W. Christensen and wife of this city have gone to Iowa where the latter will visit with his relatives. Before returning home they will proceed to Minnesota, where Mrs. Christensen will pay a visit to her home town. They expect to be gone about a month.

J. J. Maher of Coalinga is at the Hughes.

Alex Gordon formerly of Fresno, is here from Sacramento.

E. C. McCallan was an arrival at the Hughes yesterday from Rochester, N. Y.

Jesse D. Pritchard of Coalinga is at the Fulton.

W. S. Duval of San Francisco is a guest at the Hughes.

C. F. Hager of Lathrop is stopping at the Fulton.

W. W. Sweet, the Coalinga oil man, is registered at the Hughes.

Mr. and Mrs. F. Perry of Coalinga are at the Fulton.

S. D. Louisa, the ex-Tiger, is a guest at the Fulton.

Will Coates, the state architect, is in the city from Sacramento.

J. D. Brennan, superintendent of the Southern Pacific at Bakersfield, is stopping at the Hughes.

George H. Monroe has returned from a sojourn in San Francisco.

Mrs. J. G. Hall of Kerman is at the Hughes.

C. J. Craycroft, the brick manufacturer, and Mrs. Craycroft, will leave today for an extended tour of the West. They expect to be gone for two or three months.

A. R. Field, president of the Fresno Traction company, will leave this morning for his home in Los Angeles.

Among the passengers to San Francisco last night were the following Fresnoans: M. F. Tarpey, A. R. Willis and M. Guggenheim.

DIED

FERRILL—In Richmond, September 30, 1939, Horatio Ferrill, a native of Iowa, aged 28 years.

Funeral services this morning at 10 o'clock from the undertaking parlors of Stephens & Bean. Interment in Mount View cemetery.

George Washington Jr. Clothes

NEWS OF EVENTS IN REALM OF SPORT

OAKS TAKE TWO GAMES

Tigers Relegated To Second Place In League

Schimpff and Henderson Oppose Each Other in Both Games.

HACKETT WORKS TRICKS

Moreing's Crew Plays Inside Ball and Profits Thereby.

(Special to the Republican.) OAKLAND, Oct. 6.—Oakland is now in first place, by taking a double-header this afternoon, the first game by the score of 4 to 3, and the second, 4 to 0, the invaders advanced to the top of the ladder in the State League and relegated the Fresno Tigers to second place.

Henderson and Schimpff were the opposing star artists in both contests and considering that they twisted eighteen innings of ball, gave good accounts of themselves. In the opening game Henderson got off bad, when three runs were scored on two hits, a rib roaster, an out and two fielders' choices, but thereafter he was invulnerable and permitted four scattered hits. Oakland made two runs in the fifth on Newlon's walk, Hackett's single, Henderson's drive to right, Campbell's hit to center and Sheehan's sacrifice fly.

Three singles tied the score in the eighth and Muskanian scored the winning run in the ninth on a single, an out and Frank's error.

Fresno did not have a look-in in the second exhibition, Henderson having a baffling assortment of failures, while Schimpff's slants grew easier as the game progressed. A two-bagger, a fielder's choice and a squeeze brought Hackett across the plate for the first run in the fifth, the fourth resulted in two more on hits by McQuinn and H. Smith. Burns, out, a double steal and a squeeze play. Hackett's frazzles caused the last fly. After he was hit by a pitched ball, though there was a man on second and third, he made a bluff to steal, causing Kuhn to throw to Kelley, in the meantime Burns scored from third.

Moskman's fielding in center was the feature, accepting five difficult chances in great style.

M'AFFEE'S PLAY AT HANFORD TODAY

HANFORD, Oct. 6.—If the McAfee team of Fresno does not face defeat for the second time in its temporary exile, it will not be because Chick Martin's Doves have not made all possible preparation to put in the fight of their lives. It is known that Fresno is something under the warm blankets they received three weeks ago and they have, it is understood, strengthened their team with two players of more than local renown. The line-up for Hanford will be: Buckles, p; West, c; Morgan, 1b; Tigner, 2b; Martin, 3b; Haas, ss; Stewart, lf; Heffernan, cf; Rogers or Graham, rf; Bles and Frankner, substitutes.

MOTORCYCLE RACES ARE CALLED OFF

Last night Chairman George Wood of the racing committee of the Fresno Motorcycle Club, decided to call off the motor speed events scheduled for this afternoon at the fair grounds. Earlier in the evening, the threatening clouds cleared away, and it was announced that the races would be pulled off as originally planned. However, at midnight the clouds began to gather and every indication was for more rain before morning. Not until then did Chairman Wood decide to call off the speed events. The same program with a few additions, making fifteen high-class events in all, will be put on at the county fair. The fair association has set aside the second day of fair week, Tuesday, October 10th, as "Motorcycle Day," and F. M. C. will conduct what promises to be the most successful program in the history of the local track.

LOS ANGELES, Oct. 6.—In both games here today Los Angeles won from Vernon through superior ball playing. The first game resulted in a score of 4 to 1 in favor of Los Angeles, and the second game stood 6 to 1 at the end of the fifth inning, when it was called by stipulation. Vernon piled up an aggregate of ten hits in the first game, but only one run. This came when Coy sent the ball to the fence for a double and Eagan brought him around with a single, after two men were out. Scores: First game: R. H. E. Los Angeles 4 0 0 0 0 0 0 0 0 0 0 0 0. Vernon 1 0 0 0 0 0 0 0 0 0 0 0 0. Batteries: Coy, Smith, Delmas and Nagle; p. Second game: R. H. E. Los Angeles 6 0 0 0 0 0 0 0 0 0 0 0 0. Vernon 1 0 0 0 0 0 0 0 0 0 0 0 0. ARRANGING DETAILS FOR PRESIDENT TAFT'S VISIT

Distinguished Traveler To Be in Fresno Three Hours and Every Minute of Time Will Be Made To Count

Preliminary arrangements were made yesterday afternoon at a meeting of the local committee for the reception of President Taft during his visit to this city on October 10th. Owing to the fact that the chief executive will be here on Sunday the reception will be a very formal one. There will be no demonstration of any kind and the President will simply be taken from the train to the Court House park bandstand by a route to be decided upon within the next few days. The address of the President will be delivered from the stand, and immediately afterward he will be taken on a drive to Kearney Park, and if time will permit to the country lying to the east of the city. President Taft and his party will arrive in Fresno at 3:15 in the afternoon on the second section of train 81 of the Southern Pacific, and he will take his departure about 6:15 in the evening. This will give him three hours in this city, and in view of the fact that darkness sets in early in the evening, it is proposed to utilize the first two hours to the best advantage possible.

Some effort was made at the meeting of the committee yesterday to arrive at some sort of understanding as to the route that the presidential party will take from the platform of the Southern Pacific to the Court House park in order that the largest number of people possible should be given an opportunity to see the distinguished visitor. At first it was proposed that the party should be taken in automobiles that will be provided, from the depot in a direct line to the park, either down Mariposa or Tulare streets. Later it was decided by motion that the route should be down Mariposa to J. down J to Tulare and then to K, and from there on to Fresno street, where the president would leave his auto and enter the park by the shortest possible cut.

COMMITTEE TO DECIDE.
But finally upon the suggestion of M. F. Tarpey, it was decided by the committee that the selection of the

route would be left to a sub-committee consisting of Mayor Rowell, Chief of Police Shaw, Chairman Hobbs, George C. Bowdoin and Henry Hawson. The last three named will also have charge of the routing off of the streets which the presidential party will pass in or through the city. The committee is expected to convene again tomorrow and make progress of the party difficult.

ARRANGING FOR CHILDREN.

The matter of selecting some place of vantage for the school children to see the president came in for considerable discussion at the meeting of the committee, and it was finally passed up for a decision to a sub-committee consisting of Superintendent of Schools McLane, Chairman Hobbs and A. M. Drew. At first it was proposed to have the children up on K street, on those two blocks along Court House park, and between Tulare and Fresno streets. It was suggested that terraces be built and that the children, of whom

there are about 1,000, be allowed to stand there with the president's party. After the party were seated, the president would be taken to the center of the city and which are elevated, be roped off, and then the children be gathered there. It was then proposed to have the children be taken to the center of the city and which are elevated, be roped off, and then the children be gathered there. It was then proposed to have the children be taken to the center of the city and which are elevated, be roped off, and then the children be gathered there.

EXERCISES AT PARK.
The exercises at the band stand after the arrival of the president will be under the charge of Mayor Rowell and the Ministerial Union. In this particular feature the general committee has decided not to interfere, excepting to place itself on record as being in favor of the president being introduced by the mayor. Mayor Rowell during the course of the meeting yesterday stated that he considered it proper for only one of the ministers to deliver an invocation after the arrival of the president. Then the latter would be introduced and proceed with the delivery of his speech. At his suggestion the entire audience would rise and sing "America." While this program as yet is only a suggestion from the mayor, it is more than likely that it will be carried out. The president's time as stated is very limited here, and it is not desired that any of it shall be taken up by local orators.

WANT PRIVILEGES.
Personal communications are already beginning to arrive by the dozens from persons who consider that they should be accorded seats on the platform with the president and his party. All sorts of reasons are being advanced by the applicants as to why they should be privileged in this respect. The committee consisting of A. L. Hobbs, Mayor Rowell and Chief of Police Shaw has been appointed to select those who will occupy the platform. The members of this committee have no authority as individuals to grant the "privileges," but must act collectively on all applications.

One of the privileges to be conferred will be to the local members of the G. A. R. The "vets" have requested that they be allowed to occupy front seats in the audience in order that they may hear the words of the president. The general committee yesterday decided to grant the request of the old warriors. Ropes will probably be utilized in order that no one at the last moment shall be able to deprive the "vets" of their seats.

At the depot the presidential party will be met by a long string of automobiles, and the citizens will be invited to occupy the head machines. For

RAISIN GROWERS MEET THIS WEEK

Tielman Plan Up for Final Settlement.

Committee Will Announce First Directors Within Next Few Days.

A mass meeting of the raisin growers of the county will be called this week for the purpose of effecting the organization of the raisin growers' corporation, proposed by E. Tielman and others. The committee appointed for the purpose of selecting the first board of directors for the concern has not as yet completed its labors, and it was stated last night that the committee would be prepared to report its selections at the early portion of the present week. Just what day this report will be made, however, is not known and it is therefore at this time impossible to state when the subsequent meeting will be held. Wylie M. Giffen, who is a member of the committee appointed to choose the directors, stated last night that he did not think the mass meeting will be called until the latter portion of the week, but that then all the preliminary details will have been arranged and that all the growers will be required to do is to be on hand and to render their opinion either in favor or against the plan by subscribing for stock or else refusing to do so.

This purpose a number of autos have already been offered. Just what persons aside from the reception committee will occupy the machines has not yet been decided. A suggestion has been made by the raisin people and will likely be adopted, that the depot platform be roped off. It is thought probable that upon the arrival of the president's train hundreds of persons will seek to avail themselves of the first opportunity to see the visitor, and that unpleasant crowding may result. This suggestion will in all likelihood be adopted.

GOVERNOR INVITED.
Mayor Rowell has sent a communication to Governor Gillett inviting him to be present in Fresno at the same time as the president to assist in the reception. Up to the present time no word has been received from the governor. It is thought, however, that Governor Gillett might possibly be calculating on accompanying the president on the greater portion of his journey through the state, in which event he will of course come to Fresno, and the latter's return from the Yosemite valley.

meeting when called will probably be held in Einstein hall.
It is stated by those who have been promoting the plan from the start that the first meeting will be held on Sunday, October 3, at 10 o'clock. The committee has been heard from the growers regarding the ultimate success of the organization, and that but little trouble is anticipated in securing the required number of subscribers.

The contract that the growers will be expected to sign for a term of five years has been undergoing a pruning process since the last gathering of those interested, and by the time that the mass meeting is called will be in concise shape and in language that any person may understand without the need of securing the services of a Philadelphia lawyer to interpret the document.

With a board of directors worthy the confidence of all and a contract

Health-Ray Glasses

The Health-Ray Lens is new alike to the doctor and to the people, and while it has been on the market in a quiet way for some time, only recently had we occasion to inquire into its merits, and now offer it to our trade.

The Health-Ray Lens is the lens of universal quality light. It admits to the eye ninety per cent. more of the vital light that gives growth to vegetable life, and health, and tone and vigor to human life, than does the old lens.

We have simple tests that demonstrate the wonderful light transmitting qualities of this lens, but only in actual wear can its excellence be appreciated.

We shall be pleased to have you call and examine into the merits of this wonderful new lens of light and good sight.

The Coalinga National Petroleum Co.

Again invites the public to join with them on the ground floor basis. The last block of 35 cent stock is rapidly being subscribed.

An opportunity such as we are offering now should be taken advantage of without delay.

We court investigation and comparison with any and all propositions in the Coalinga field.

This well is on the same oil strata, as the SILVER TIP, LUCILE and the AMERICAN PETROLEUM CO'S. flowing wells.

WE ARE OPERATING ON 80 ACRES of absolutely proven territory in the very center of the deep proven territory of the Coalinga field in which, the papers are almost daily recording, the bringing in of phenomenal wells.

THESE WELLS RANGE IN PRODUCTION from 500 to 2500 barrels per day. The wonderful productiveness of this moderately deep field is attracting capital from all parts of the world.

THE PEOPLE OF FRESNO COUNTY should awaken to the fact that immense fortunes are being made by careful and judicious investment in the shares of oil companies operating in their own county.

IT IS A WELL KNOWN FACT that territory in the Coalinga field such as is being operated by the Coalinga National Petroleum Co. is making immense profits for all who have invested therein.

THE COALINGA NATIONAL PETROLEUM CO'S. well No. 1 is now 440 feet deep and is being drilled by one of the most capable and experienced drillers in the Coalinga field.

THE FIELD MANAGEMENT of the Coalinga National Petroleum Co. is in the hands of Mr. S. R. Bowen, who for five years past has managed the "Oil Well Supply Co." in Coalinga.

SUCH AN OPPORTUNITY FOR SAFE INVESTMENT has never before been put to you. Remember there are five times as many dollars being made per year in the oil business at Coalinga as there are in all the broad acres of peaches and grapes of Fresno county put together.

If you have any money to invest, *now is the time*. And the place to invest it is in the Coalinga National Petroleum Company's shares.

When you buy---buy right. Every man who has bought right in the good deep proven territory of the Coalinga field, has made and is making big money. **BUY NOW**---while the opportunity is yours.

Make Your Own Lamp Shades

Charming Effects That May Be Evolved With Colored Cut Paper For Home Decoration.

To meet the ever increasing demand for novel and artistic shades, whether for lamps, candles or electric bulbs, many ingenious and fanciful designs constantly appear in the shops that cater especially to the needs of the modern world. Not a few clever girls also evolve charming lamp shades for the decoration of their homes, for

shades are hardly distinguishable from those of the best genuine mosaic glass. These very novel contrivances are far from difficult to make, the materials necessary being card and book cloth of various colors, perforated patterns or stencils, paper, glue, a sheet of glass or hard board, a sharp knife and a pair of fine scissors. The stencils are formed in sections—six sides and a top piece for large lamp shades, four sides

you want to carry out original patterns. You must trace their subject with a broad double outline of uniform width—to stimulate the leading employed in the stencil, which should not be very thick or the cutting out process will be rendered very difficult. Four or six sections will be required for the sides and a square piece for the top. The card-board is then laid on a sheet of glass or very smooth hard wood and all the intervening spaces between the lines cut away with a sharp pointed knife or with small scissors. The keen-edged, thin instruments used for making the stencil are ideal for this purpose. This is really the only arduous part of the work. The design is successfully made the rest is easy. A tiny bit of emery paper can be used to smooth all rough edges. Any emery must be pressed

in each design. In the daily life, for instance, the centers of the flowers are brown, the petals yellow and the leaves in two shades of green. The right border of each section should be double the width of the left one. A line is drawn down the center and turned back to form a clean, sharp turning. This extra fold is glued beneath the left border of the second section, which in turn is secured in the same manner to the third, and so on until all sides are completed. They are lined with white tissue paper. The square forming the top is also provided with extra pieces for turning in and gluing to the top edges of the sides. Any color scheme can be selected, as the designs are purely conventional. Butterflies are attractive and may be arranged in an endless

two tones of green. It is not necessary, however, to confine oneself to floral designs, especially when panels or window decorations are in process of making. Figures are remarkably effective and not so hard to manage as one would imagine. Features, details of hands, etc., must be painted in an cream or flesh colored cloth at the top of the design. A study of stained glass will greatly assist as to the arrangement of borders, backgrounds and coloring. Costs of arms and handle designs generally are highly adaptable to this cut paper work. Practical and prosaic details suggest that the delightful night light holders may be made in cylindrical form, ornamented with cut heads, owls, bats and other nocturnal emblems calculated to shed a cheerful radiance in dark corners during the long, silent watches of the night.

Some Treasured Recipes of Footlight Favorites

CHOCOLATE CAKE.

By Rosalind Coglian.

One and one-half cups granulated sugar, one-half cup butter, one and three-quarter cups flour, three fresh eggs, two ounces cocoa dissolved in five tablespoons of boiling water, one-half cup milk, one teaspoonful baking powder and one teaspoonful extract vanilla. Cream the sugar and butter together, add the well beaten yolks of the eggs, then add the cocoa dissolved in the boiling water, add the milk, then add the flour and baking powder, lastly folding in the well beaten whites of two eggs, reserving the white of one egg for the icing, flavored with a teaspoonful vanilla.

To make icing take one cup of sugar and four tablespoons of water and boil together until the sugar strings from a spoon, pour this into the well beaten white of one egg, beat thoroughly until cool, then spread on cake.

CHICKEN A LA KING.

By Grace Filkins.

Take the breast of one nicely cooked chicken and cut into small pieces, one dozen large mushrooms, cut up one large onion in pieces, place a piece of butter in the chafin dish and let it get hot, then add the mushrooms and green pepper and cook. When done add one cup of cream and chicken and

OMELETTE A LA CARTE.

By Marion Kerby.

Six eggs, one teaspoonful of butter, six squares of Swiss cheese, one teaspoonful of onion, one tablespoon dash of pepper, one teaspoon of minced French parsley, well drained, one egg, one-half teaspoon of salt, one-half cup milk, salt, pepper and onion or garlic juice in pan and place over the lamp. When warmed add the white of eggs, well beaten. Cook about five minutes, then add the peas, food together and serve hot.

LEMON PIE.

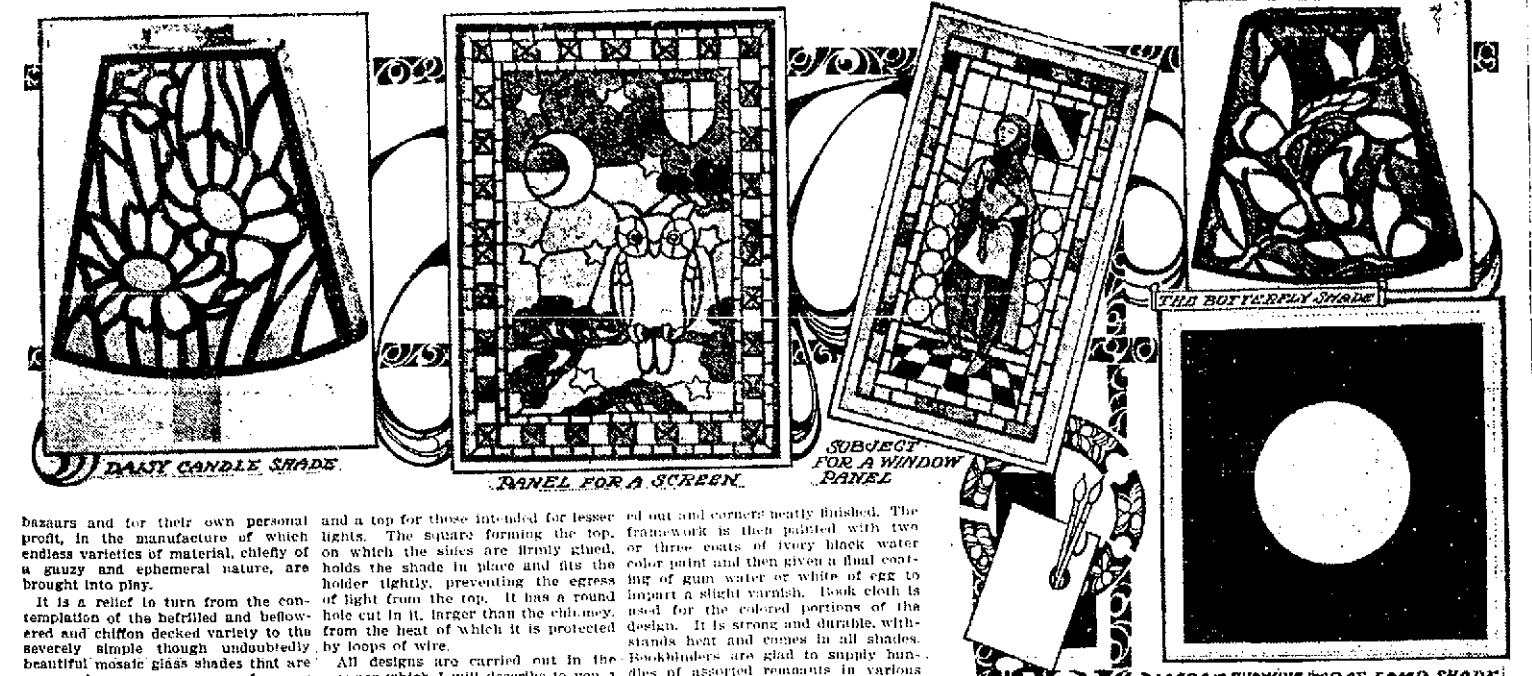

By Ann Murdoch.

For lemon pie one cup of boiling water, one cup of sugar, two tablespoons of lemon juice, two eggs, two lemons, well washed, one-half cup of milk, one-half cup of water, one-half cup of sugar and butter. Mix the sugar and butter together, add the well beaten yolks of the eggs, then add the lemon juice dissolved in the boiling water, add the milk, then add the flour and baking powder, lastly folding in the well beaten whites of two eggs, reserving the white of one egg for the icing, flavored with a teaspoonful vanilla.

LEMON PIE.

For lemon pie one cup of boiling water, one cup of sugar, two tablespoons of lemon juice, two eggs, two lemons, well washed, one-half cup of milk, one-half cup of water, one-half cup of sugar and butter. Mix the sugar and butter together, add the well beaten yolks of the eggs, then add the lemon juice dissolved in the boiling water, add the milk, then add the flour and baking powder, lastly folding in the well beaten whites of two eggs, reserving the white of one egg for the icing, flavored with a teaspoonful vanilla.

bazars and for their own personal profit, in the manufacture of which endless varieties of material, chiefly of a gauzy and ephemeral nature, are brought into play. It is a relief to turn from the contemplation of the befrilled and beflowered and chiffon decked variety to the severely simple though undoubtedly beautiful mosaic glass shades that are so popular among owners of rooms furnished with the dignified restraint that is such a pleasing feature of furnishings nowadays. These glass shades are only possible for use on large and heavy lamps and are really impossible on a reading lamp, as they obscure the light, but there is an extremely practical and effective imitation in the new cut paper shades which does away with both of these objections. When placed over the light the paper

and a top for those intended for lesser lights. The square forming the top, on which the sides are firmly glued, holds the shade in place and fits the holder tightly, preventing the egress of light from the top. It has a round hole cut in it, larger than the chimney, from the heat of which it is protected by loops of wire. All designs are carried out in the manner which I will describe to you a little later, and here it may be well to say that this imitation stained glass may be made to serve other purposes, such as panels, to hide unsightly views and in numerous different ways in which decorative glass is called on to play a part. It will be readily seen from a glance at the illustrations that the designs used for this work are similar to those used in the popular art of stenciling, obtainable anywhere. If

ings are given to the instruction of boys. Besides this night school, Miss Wright has built a home for crippled children and is a matron of the Home For Convalescents.

Miss Gertrude MacArthur, daughter of the Rev. Dr. Robert S. MacArthur, pastor of Calvary Baptist church in New York city, has been appointed a teacher of English in the perceptive school at Tokyo. This school has only the daughters of the nobility of Japan for its pupils. A daughter of the mikado is being educated there.

Genevieve Clark, fourteen years old, daughter of Champ Clark, representative from Missouri, has developed a surprising grasp on public questions, and her father enjoys nothing better than a political argument with her. She frequently makes pointed speeches to friends in the Clark home, and to their delight she usually takes the Republican side against her father. The girl goes to the Friends' school in Washington and is as quick in her studies as she is in politics.

It is customary to associate the ballet with lightness of character, but Louis XIII, the gloomy not only loved the ballet, but was known to have taken part in it. But it was under the magnificent reign of Louis XIV, that the ballet flourished, and the king planned such costumes of splendor as he considered worthy of the Olympian gods Neptune, Phoebe and Bacchus. Mme. de Montespan, notwithstanding her forty-eight years, regained the heart of the fickle monarch by her ballet dancing.

The Empress Eugenie, who has had so many years of heartache, finds her comfort in getting close to Mother Earth. At her Riviera villa she leads a quiet life and in her garden often weeds the beds with her own hands, still so delicate and pretty, though so old. No half withered bud or blossom is left on a rosebush or a plant, and she knows how to wage war against slugs and snails. At Sir Thomas Lipton's estate in Colombia, where she was a recent guest, one wonders if she assisted in the gathering of the tea leaves. When it rains she plays patience, laying the cards before her on the table in a solitary game. To play patience and to poke around the flowers—even an empress must thus find her comfort in a lonely old age.

DR. COOK HAT FOR WOMEN.

The newest fashion in women's hats has been named the "Dr. Cook." It is suggestive of the polar region. It is all in one with the gathered sleeves that barely reach the elbow. The corset is a very high one, and the folds of the neck hood are tucked into it. But it remains a corset, and there are no barettes to continue the line over the shoulders.

WHAT WOMEN ARE DOING.

Miss Sophie Wright, founder of the first night school in New Orleans, is one of the few women who have received the loving cup which is annually presented to the citizen who has done the greatest public good for the city during the year. In this cup was a check for \$10,000, which had been subscribed by the citizens of New Orleans to pay the debt Miss Wright has assumed in enlarging her night school to make room for the pupils who were clamoring for admission.

The night school was started more than twenty-five years ago. Miss Wright, who has been a cripple from her cradle, was at that time a teacher in the public schools of New Orleans. One night a young man, an acrobat in a stranded circus, came to her and begged her to teach him how to read and write. He was sure of a good job could be only learn these two accomplishments. Though he hadn't any money, Miss Wright began to teach the young acrobat at night. From this beginning the school increased until it now has about 2,000 pupils in attendance each night. Miss Wright teaches a girl's school during the day and in that way earns her living. Her even-

ing are given to the instruction of boys. Besides this night school, Miss Wright has built a home for crippled children and is a matron of the Home For Convalescents.

It is customary to associate the ballet with lightness of character, but Louis XIII, the gloomy not only loved the ballet, but was known to have taken part in it. But it was under the magnificent reign of Louis XIV, that the ballet flourished, and the king planned such costumes of splendor as he considered worthy of the Olympian gods Neptune, Phoebe and Bacchus. Mme. de Montespan, notwithstanding her forty-eight years, regained the heart of the fickle monarch by her ballet dancing.

The Empress Eugenie, who has had so many years of heartache, finds her comfort in getting close to Mother Earth. At her Riviera villa she leads a quiet life and in her garden often weeds the beds with her own hands, still so delicate and pretty, though so old. No half withered bud or blossom is left on a rosebush or a plant, and she knows how to wage war against slugs and snails. At Sir Thomas Lipton's estate in Colombia, where she was a recent guest, one wonders if she assisted in the gathering of the tea leaves. When it rains she plays patience, laying the cards before her on the table in a solitary game. To play patience and to poke around the flowers—even an empress must thus find her comfort in a lonely old age.

DR. COOK HAT FOR WOMEN.

The newest fashion in women's hats has been named the "Dr. Cook." It is suggestive of the polar region. It is all in one with the gathered sleeves that barely reach the elbow. The corset is a very high one, and the folds of the neck hood are tucked into it. But it remains a corset, and there are no barettes to continue the line over the shoulders.

WHAT WOMEN ARE DOING.

Miss Sophie Wright, founder of the first night school in New Orleans, is one of the few women who have received the loving cup which is annually presented to the citizen who has done the greatest public good for the city during the year. In this cup was a check for \$10,000, which had been subscribed by the citizens of New Orleans to pay the debt Miss Wright has assumed in enlarging her night school to make room for the pupils who were clamoring for admission.

The night school was started more than twenty-five years ago. Miss Wright, who has been a cripple from her cradle, was at that time a teacher in the public schools of New Orleans. One night a young man, an acrobat in a stranded circus, came to her and begged her to teach him how to read and write. He was sure of a good job could be only learn these two accomplishments. Though he hadn't any money, Miss Wright began to teach the young acrobat at night. From this beginning the school increased until it now has about 2,000 pupils in attendance each night. Miss Wright teaches a girl's school during the day and in that way earns her living. Her even-

ing are given to the instruction of boys. Besides this night school, Miss Wright has built a home for crippled children and is a matron of the Home For Convalescents.

Miss Gertrude MacArthur, daughter of the Rev. Dr. Robert S. MacArthur, pastor of Calvary Baptist church in New York city, has been appointed a teacher of English in the perceptive school at Tokyo. This school has only the daughters of the nobility of Japan for its pupils. A daughter of the mikado is being educated there.

Genevieve Clark, fourteen years old, daughter of Champ Clark, representative from Missouri, has developed a surprising grasp on public questions, and her father enjoys nothing better than a political argument with her. She frequently makes pointed speeches to friends in the Clark home, and to their delight she usually takes the Republican side against her father. The girl goes to the Friends' school in Washington and is as quick in her studies as she is in politics.

A Frilly Autumn Costume

It is predicted that we will have a season of frills and, furthermore, which will be a decided contrast from the flat trimmings that have been decorating our gowns lately. Ribbons, it is said, used as trimming, both in rosette and shawl, are to be seen in a number of costumes less severe in type than the tailor made. Indeed, even on many

ings are given to the instruction of boys. Besides this night school, Miss Wright has built a home for crippled children and is a matron of the Home For Convalescents.

INDIAN LANDS FOR THE WHITE AND RED RACES

HENRY HUDSON BARTERING WITH THE INDIANS

ASA DAKLUGIE HOEING CORN

JIM SAM, CHIEF OF THE SPOKANES

ASA DAKLUGIE CHIEF OF THE APACHES

IN throwing open more of the Indian lands of the west for settlement by white the government is making opportunities for home builders and increasing the territory which may be developed into large and populous and prosperous communities. But how about the red man? Is it fair and just to deprive him of his hunting grounds even to give homes and chance to make a living to people of another race? How is the Indian looking out where he has been thrown on his own resources and compelled to work for a living like the men of other races? These and similar questions suggest themselves as one reads about the rush of the thousands of white settlers to the lands, so long the camping grounds of the red men, which are soon to become farms and pastures and town sites.

Uncle Sam is this autumn opening up Indian lands in North and South Dakota and Montana. Registration for taking up these lands has been a going on for some weeks. Prospective settlers sent in letters to the land office at the rate of about 1,000 a day. The largest of these tracts is that of the Flathead Indians in Montana. It constitutes an empire of some 14,000 acres just west of the main range of the Rocky mountains. Since 1825 this tract has been the abiding share of the confederated tribes of Flathead, Kootenai and Pend Oreille Indians. Originally they claimed jurisdiction over all the lands in Montana west of the Rockies and the foothills of Idaho, but they entered into a treaty with the federal government by the terms of which they were confined to the limits of their present reservation, which was their choice of all the country over which they once roamed. For a long time there has been a demand on the part of the whites for the opening up of this land to settlement.

The fiction of the Indians in favor of selling a part of their lands finally outnumbered that in favor of protection

of the whole, and now President Taft has stated the proclamation by which the territory will be taken up by settlers under the homestead laws and made in time a productive and populous region. But by no means is all of the Indian land to be sold and made into farms and mining communities and towns for white occupation and exploitation. Out of the 14,000 acres of land comprising this reservation there will be retained for the red men 10,000 acres. Divided among them this would give each member of the tribe a nice good sized farm. The procedure is similar in the case of the other reservations. In the state of Washington, for instance, the Flatheads retain 60,000 acres, or nearly one-half of their lands.

Though the red men have lost a great deal of the country over which they once roamed and fought and which in a measure they have retained, still, taken as a whole, the Indians of the United States are a rich race. The value of their lands is great. The problem consists in getting them to make good use of it. Some are too lazy to do this, and some are too stupid. Others are too proud. Enough of them are too stupid, however, to make a proper use of the land. The red man will learn in time how to use the land to his advantage and how to become a valuable part of the civilized world. For him to become a citizen and take upon himself the responsibilities of a citizen is a step which he has not yet taken. The fact is that the red man is not yet a citizen. He is not yet a part of the white population. He is not yet a part of the white population. He is not yet a part of the white population.

At present report by the board of health of New York state calls attention to the prevalence of pulmonary troubles among the Indians of the Empire State belonging to the once powerful league of the Six Nations, or Iroquois. No doubt many people will be surprised to learn that there are at the present time between 5,000 and

6,000 Iroquois Indians on the reservations of New York and Canada, or nearly as many as there were in the same or contiguous territory at the time when the whites first began crowding them off their land. They still own some of the most valuable lands in New York state and in the province of Ontario, and some make good use of it and some do not.

Hospitality of the Red Race.

Rodman Wanamaker, son of the noted merchant, John Wanamaker, in his suggestion regarding the erection of a colossal statue of an Indian at the entrance to New York harbor, reminds the country that originally the red man welcomed the paleface and treated him with hospitality. It was only after the white man had proved a false friend that the red man's heart was turned against him and his hand was clenched with the white brother's blood. This was illustrated in the way the aborigines received the pilgrims in Massachusetts and the Dutch on Manhattan Island.

There are some interesting records by Henry Hudson himself as to the friendly ways in which the Indians received him and his fellow navigators when they made their historic journey up the Hudson in the Half Moon. It is related how they paid to him the highest tribute of aboriginal hospitality by serving up a roasted dog, with a pair of pheasants and other delicacies, and when he was about to leave one Indian settlement the natives broke their bows and arrows in pieces to show that they were not hostile. On still another occasion, at Albany, they came aboard with a plentiful of venison, made reverence to Hudson and, presenting him with strings of wampum, "made an oration."

EDWARD HALE BRUSH.

Result of Olive Crop Shortage.

Previous to May, 1907, cottonseed oil could not be imported for eating purposes into Turkey, coloring matter being added to the oil upon entry at the custom house in order to render it unfit for food. This prohibition has been removed, and because of the shortage of recent olive crops the native epicures now get their oil and cooking oil mixed with the cottonseed product.

Big Friction Saws.

The largest friction saws in the world are used in one of Chicago's huge construction plants. They cut through a ten inch steel beam in fourteen seconds. These saws or disks generate enough heat at the point of contact, thereby to melt their way through the metal being cut. The cutting edge of the disks is roughened by simply holding with a fish tail chisel.

Curious Chinese Advertisement.

A Chinese newspaper contains the following advertisement of a local ink manufacturer: "At the shop The Shing (Prosperous in the extreme), very good ink. Finest! Finest! Ancient shop, great grandfather, grandfather, father; very hard; picked with care, selected

so powerful and so diffusive in its perfume that the most minute quantity when mingled with any other strong scent is still perceptible.

Brazil Behind in Telephone.

The telephone system of Brazil is still in its infancy. Although Brazil has twenty states similar to those of this country, it has no interstate telephone line, and by reason of the interstate restriction it has few telephone lines serving rural districts within the several states themselves.

When England Imported Vegetables.

Until the end of the reign of Henry VIII, according to the historian Hume, no carrots, turnips or other edible roots were produced in England. The few that were used were imported.

The Longest Telephone Span.

The longest telephone span in the world is across Lake Wallenstadt, in Sweden. Steel towers nearly 8,000 feet apart support the wires.

Curious Postal Law in Mexico.

The Mexican postal law does not require the postal department to deliver mail addressed to a city on which the name also of the state does not appear.

Smart Bees.

Bees have been known to fly as far as eight miles away from the hive and easily find their way back.

Don't Have to Do It Now.

Only thirty years ago Japanese soldiers wore huge grotesque iron mask helmets in order to frighten the enemy.

Illiterates in Russian Army.

Of every 1,000 recruits in Russia 700 are illiterate.

Halley's Comet on Schedule Time

The Big Telescopes Will See It Early In October, and In December It Will Be Visible to Everybody. Return After Seventy Years.

HALLEY'S comet after an absence of seventy years will play a celestial return engagement in the big telescopes about Oct. 1 coming in from the first glimmer of the wanderer has already been sighted by a professor at Heidelberg, who has notified the Harvard observatory at Cambridge, Mass. The Heidelberg astronomer, Wolf,

bright as it was in former visits. This astronomer says that this quality in comets is uncertain and that in the course of time any comet in its celestial revolutions will lose some of the brilliancy of its appearance. Another astronomer says that the comet will grow in brilliancy until next April and in length until it attains a possible reach of 45 degrees, or as he avers, a brightness equal to many full moons. The engagement will continue through next May and probably longer.

Speed of a Comet.

It will defy the fears of the timid and superstitious to know that at no time will the Halley comet be nearer to the earth than May 2 next. Just how near is not told, but it is asserted that June 12 it will pass within from five to ten million miles of the earth's orbit, and then, after making its obel-

Italy's Finder of the Hudson

Giovanni da Verrazzano, the Navigator, to Be Honored With a Monument by His Countrymen In the United States.

GIOVANNI DA VERRAZZANO will be the first to set a monument in New York city as the discoverer of the Hudson river. His partisans do not deny that Henry Hudson explored the great stream that bears his name, but they have asserted right along that Verrazzano saw the mouth of the stream a hundred years before Hudson sailed the Half Moon upon its waters. The partisans show a letter that the Italian discoverer is said to have written to King Francis I of France in which the explorer described accurately the mouth of the river. The authenticity of this letter is questioned by many geographers.

Be all this as it may, Verrazzano has loyal friends in New York, and these have taken steps to place the bust of the discoverer on a monument that will overlook the Hudson river from a conspicuous place in Battery park. The ground has been broken, the sculptor Ettore Ximenes is at work on the bust, and the unveiling will take place about Oct. 12.

The friends of Verrazzano are confident that he sailed under the flag of France, that in 1494 he visited the harbor of New York and that he named the place Nova Gallia (New York).

The plan for the memorial to the Italian that is to be set up in Battery park was conceived several months ago. The breaking of the ground and the preliminary excavations were confined entirely to Italian citizens of New York. There was but one speech on the occasion, and as it represents the claims of the Italians for naming Verrazzano as the discoverer, part of it is quoted here. The speaker, Chevalier Barzanti, said:

"It is indeed gratifying to be able after centuries of delay to break ground for the erection of a permanent memorial to the great navigator, Giovanni da Verrazzano. The ground now broken is perhaps the same over which Verrazzano sailed nearly four centuries ago. [Battery park in Verrazzano's time was under water.] Columbus discovered the continent, then Cabot explored its coast, and after Cabot came the great pilotfinder Verrazzano, the man who first saw the Hudson river."

"I hope that the strength of this monument that we are to erect will withstand the onslaught of weather as much as the fame of Verrazzano has withstood oblivion and the carelessness of men, who, as usual, have been late in recognizing the value of his work."

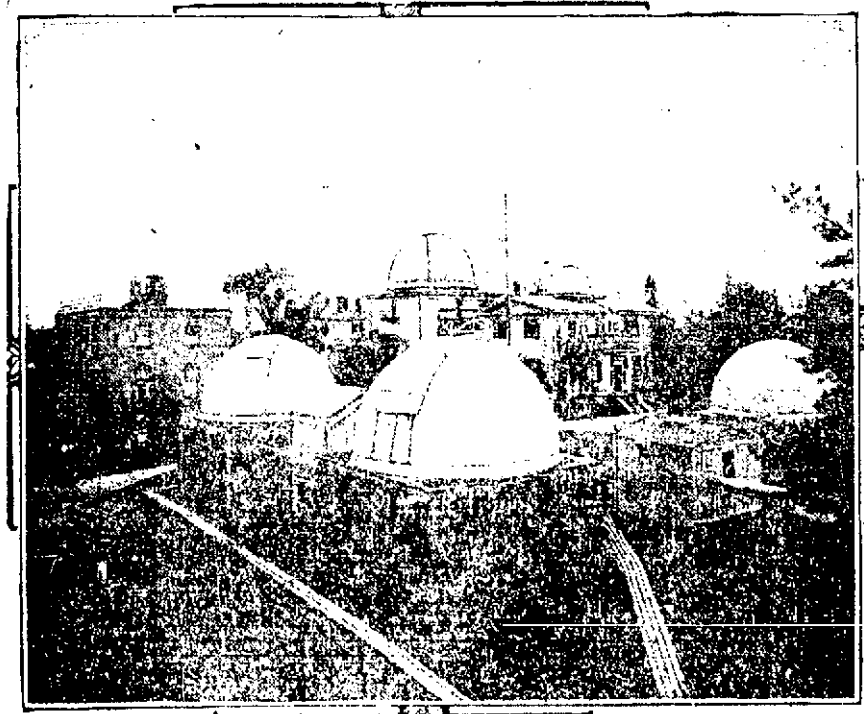

The bust of Verrazzano which is to surmount the monument was designed from a steel engraving of an old oil painting that for centuries was in the possession of the Verrazzano family of

birth is not definitely known. He journeyed widely in the east and in 1521 is reputed to have been sailing as a French corsair under the name of Juan Florentin or Florin. It appears from the few uncertain facts that remain that he was unrelenting in his attacks on Spanish commerce. His first voyage of discovery, under commission from Francis I, was apparently in 1523, though it is much confused with the doings of Juan Florin in that year against the Spaniards.

His notable voyage to America was made in 1524, and he seems to have touched the coast of North Carolina near Cape Fear. He apparently coasted south and then north, probably as far as Cape Breton. The chief evidence of this interesting voyage is a letter of Verrazzano, already referred to, and unfortunately of no historical value, inasmuch as its authenticity is doubted.

After his return from this country he fought in the battle of Pavia, Feb. 24, 1525, and was captured by the Spaniards, who kept him prisoner temporarily. If he was Juan Florin he was captured again at sea in 1527 and hanged, but some later documents indicate that he was at a later time in the year in Paris preparing another expedition to America. Nevertheless he will have a place of honor in the metropolis of the country.

FELIX DONALDSON.

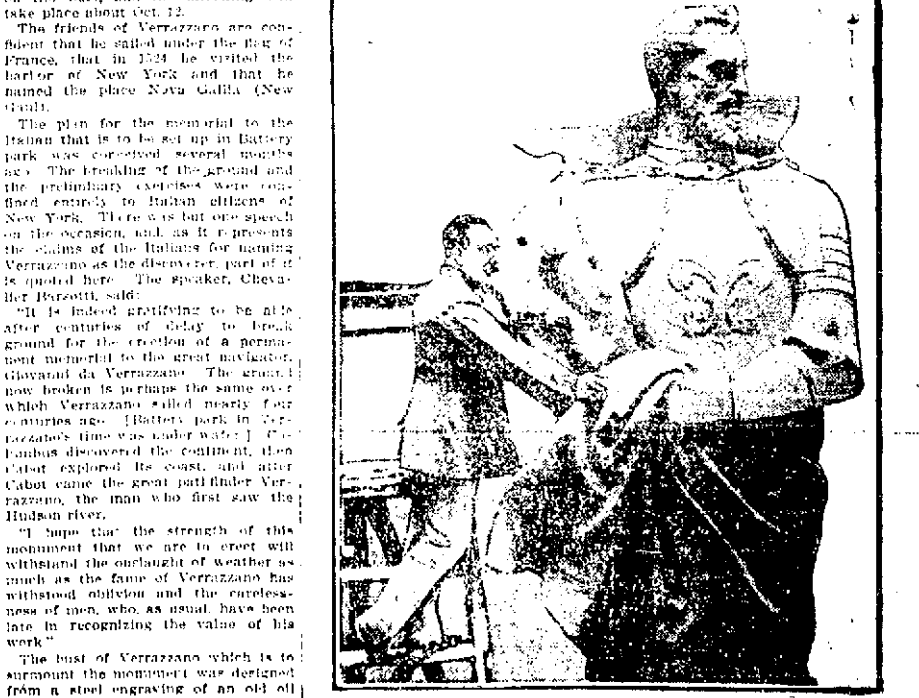

THE ASTRONOMICAL OBSERVATORY AT HARVARD.

RAW It Sept. 11 by means of the great telescope there, and it has since left a spot on a plate at Lick observatory. It has also been seen by Harvard astronomers since it was noted by Lick.

This comet was first discovered by Edmund Halley, an English astronomer, in Paris 229 years ago. It has been known as the Halley comet ever since and has returned to view for earthly

up it not definitely known, but Professor H. R. Russell of the Yerkes observatory on the heights of Geneva Lake, Wisconsin, is out with a statement that the comet will do the comet almost as soon as the big heavenly comet of the observatory already mentioned.

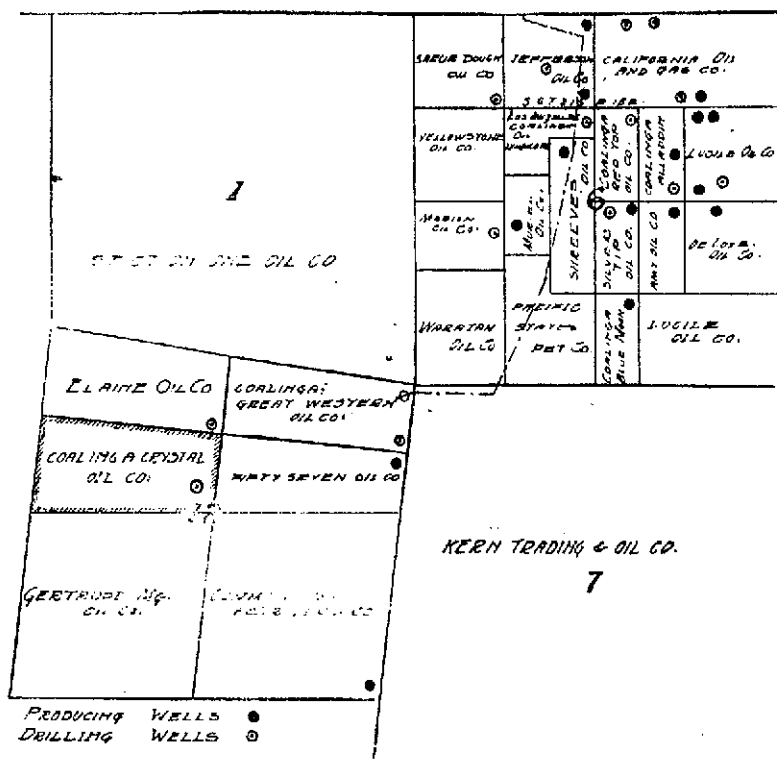

Another astronomer tells us that the comet now coming may not be as

SCULPTOR AT WORK ON VERRAZZANO STATUE.

Opportunity No. 5

We refer with pride to our success in the Silver Tip, Coalinga Blue Moon, Coalinga Great Western, and Fifty-Seven Oil Companies. These were opportunities rarely offered to the investing public to secure real meritorious stocks in companies operating on absolutely proven ground.

The wonderful success of our properties and the unusual returns our clients

have received from small investments, is now common knowledge, and again, we are here to serve the investing public, with opportunities of unquestionable merit

Our proposition No. 5, the Coalinga Crystal Oil Co., is equally as good, and should meet instant and general approval. We unqualifiedly endorse the

Coalinga Crystal Oil Company

as being a gilt edge investment proposition. There is no speculation about it--the territory is proven.

Mr. Z. L. Phelps, acknowledged to be the most successful producer in the Coalinga field, is president and general manager of the Coalinga Crystal Oil Co. He has the proud distinction of having drilled the famous Lucile wells, and the Silver Tip gusher, which latter came in with a production of 17,000 barrels per day.

Consult the map, and fix the location of this property on Section 12, adjoining the famous Section Six. No better oil territory in the state of California. It comprises 80 acres, owned by the company, with a capitalization of only 300,000 shares.

Work is under way on Well No. 1.

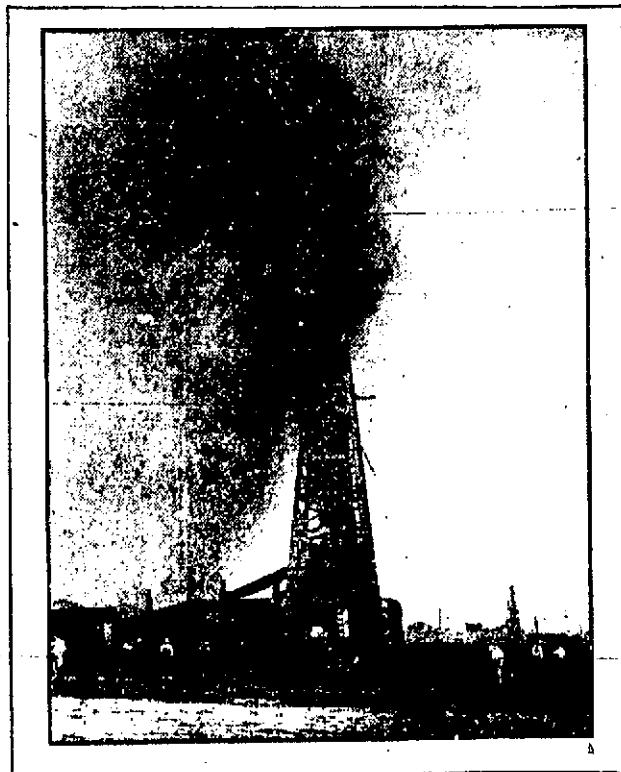

For a limited time we will sell 20,000 shares of the Coalinga Crystal Oil Co. stock at 25 cents a share.
